COMPANION TO THE TECHNICAL SPECIFICATION

Pre-Build Client Requirements

Files, sheets, VBA, business rules and client decisions that must be supplied or confirmed before the modern Complications compliance system can be built, each with the reason it is required

Applies to	Complications compliance workflow (appointments store + SystmOne → Complications Report.xlsm → Compliance Data.xlsm → dashboard)
Companion of	Complications_Compliance_Workflow_Specification.pdf (same folder). “Spec Figure N” and IDs such as P-xx, G-xx, FM-xx, FR-xx refer to that document
Evidence	Teams recording 20260814_120551 (7:58); timestamps are video positions
Data store items	IDs ending in -DS come from the client’s source template (sources/Wellbeing Dashboard current data template.xlsx); “DSL §n” and DS-xx refer to 00_Overview/Compliance_Data_Store_Logic.pdf
Report date	16 October 2026
Status	Open: awaiting client inputs. Build Phase 1 cannot start until every **Blocker** item in §6 is ticked

Why this document exists. The recording is a walkthrough: the monthly upload, counting, pasting and refresh are described but not performed, and the operator could not explain several parts. The spec found typed counts, fixed “Within benchmark” output rows, a result dated 09/04/26, two conflicting sets of standards and patient-identifiable data in the workbook. This list turns them into **28 concrete asks**, each with a reason, the evidence, who should answer it and what it blocks.

How to use it: work through §1–§5, attach files or answers against each ID, then sign the checklist in §6. Anything marked *Blocker* stops the build; the rest can be answered during Phase 1.

Summary

Category	Items	Blockers	Main owner
1. Files to supply	6	F-01, F-02, F-03	Tool owner / IT
2. Sheets, tabs and columns to explain	5	S-01	Operator
3. VBA macros to explain	2	—	IT
4. Business rules to confirm	8	R-01, R-02, R-03, R-04	Clinical lead / business owner
5. Client decisions	7	D-01, D-02, D-03	Business owner / Caldicott / IG

1. Files to Supply

Read-only copies are enough. Without these files the main logic and the target data shapes stay unknown.

ID	What is required	Why it is required (evidence)	Who	Blocks	Spec ref
F-01	**Complications Report.xlsm** (full copy) with the **All_Appts Power Query (M) code**	The query source and filters of the appointments extract were not shown (Spec Figure 4 [00:02:12]). They decide which appointments are counted.	Tool owner	Ingestion design	G-03
F-02	**SystmOne report definition** and an anonymised sample export	The complications export is pasted by hand (Spec Figure 10 [00:03:27]); the report's filters and columns set the ingestion contract.	Operator / SystmOne admin	FR-C01	EX-01
F-03	**Appointments data store access** (location, owner, schema)	Needed to replace the on-open query with a governed feed.	IT	FR-C01	G-03
F-04	**The "other document"** holding the original automated requirements and timeframes	The data store pulls Complications requirements and timeframes from it (00:07:15–00:07:41).	Tool owner	Reference data	G-11
F-05	**Compliance Data.xlsm link list** and query definitions	It shows "UNABLE TO REFRESH – linked workbook" (Spec Figure 22 [00:07:01]). Shared with specs 01 and 02.	Tool owner	Migration	G-12
F-06	**Dashboard measures** for Complications	Whether rates or only the 8 rows are shown decides the mart.	BI owner	Parity	G-14

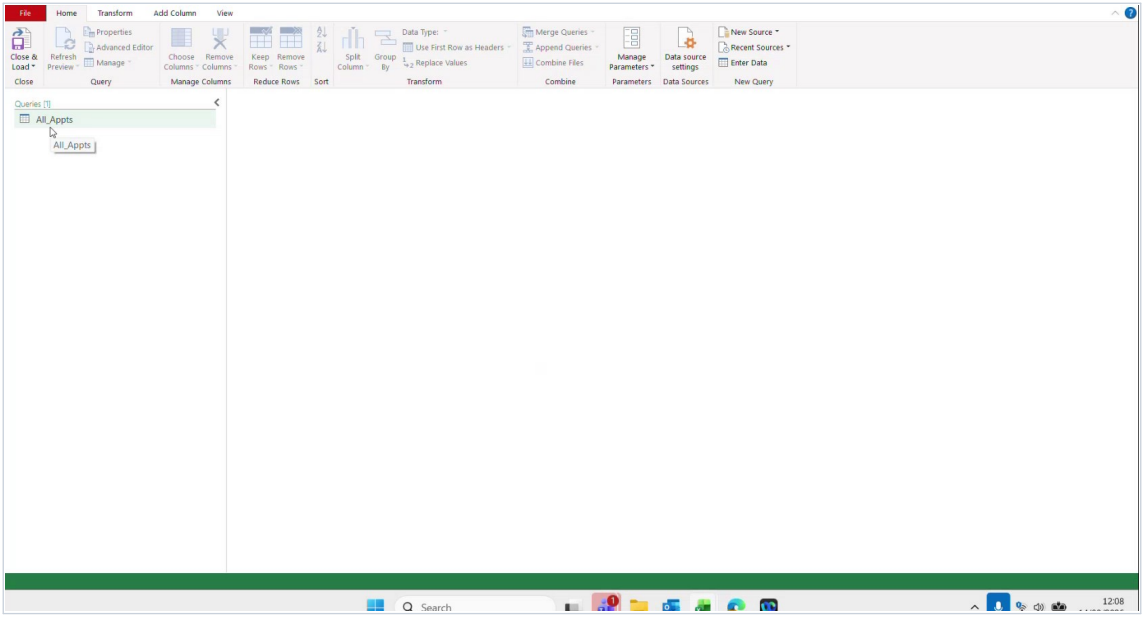

Figure 4 [00:02:12] — Complications Report.xlsm › Power Query editor: Power Query editor: one query, All_Appts, the appointments extract that refreshes when the workbook opens

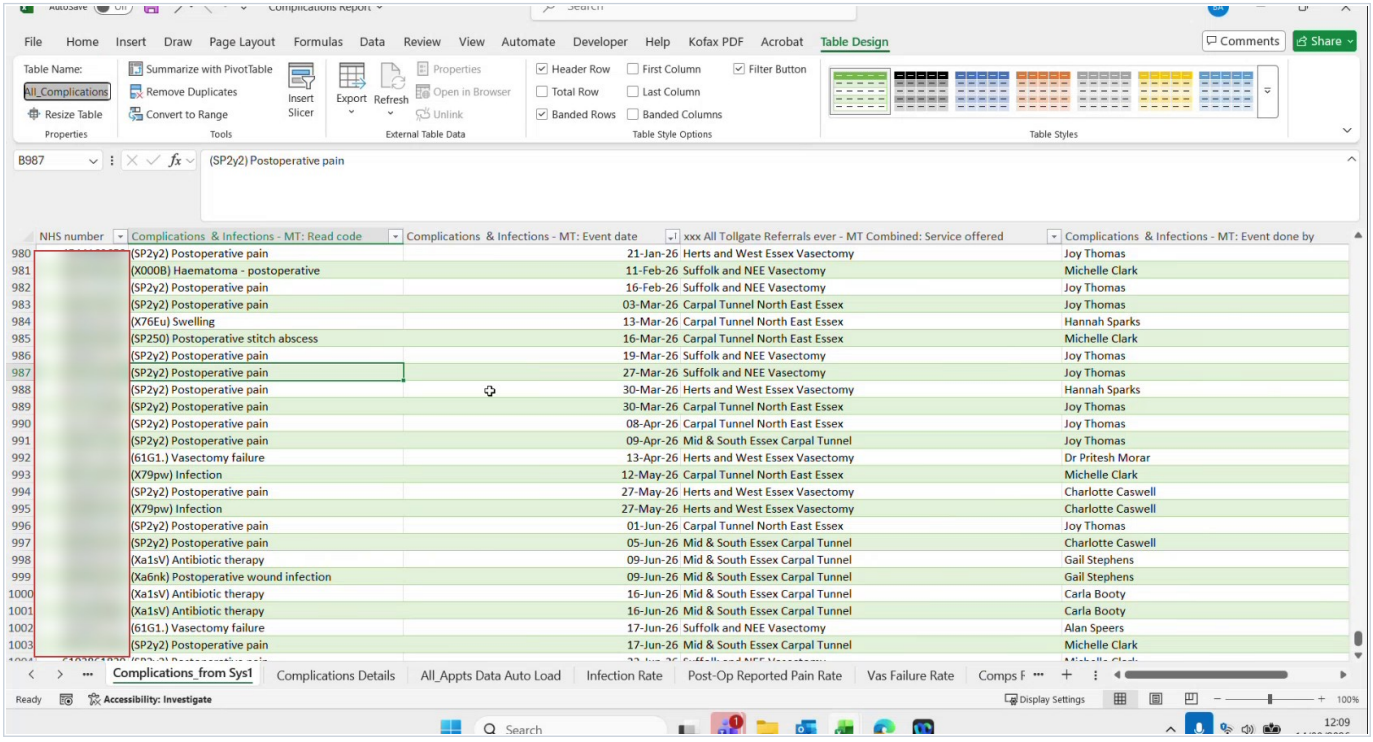

Figure 10 [00:03:27] — Complications Report.xlsm › Complications_from Sys1: SystmOne export of complication Read codes: NHS number, Read code, Event date, Service offered, Event done by (rows 980–1003, Jan–Jun 2026). NHS numbers blurred

2. Sheets, Tabs and Columns to Explain

These are parts of the workbook that were hidden, never opened, or behaved unexpectedly in the recording.

ID	What is required	Why it is required (evidence)	Who	Blocks	Spec ref
S-01	**How the monthly counts (Compliance Report rows 22–30) are produced**	They are typed (Spec Figure 16 [00:05:32]); we need the exact source and filters to compute them automatically.	Operator	FR-C04	G-05
S-02	**Complications Details log rules**: what is copied, how Op Date and clinician are found, what Include in Statistics means	The log is curated by hand; its rules become the attribution and review rules.	Operator	FR-C03	G-02
S-03	**Monthly status columns** (Mar-25…Jun-26) and the “at 09/04/26” result block	The result looks four months stale (Spec Figure 17 [00:06:14]).	Operator	FR-C06	G-06
S-04	**Sheet1, Post-Op Reported Pain Rate, Comps Reported Pivot**	Not opened; may hold rules or outputs.	Operator	Discovery	G-10
S-05	**Clinician name list** with all variants	Name variants split figures (Spec Figure 20 [00:06:45]).	Operator	FR-C07	FM-06

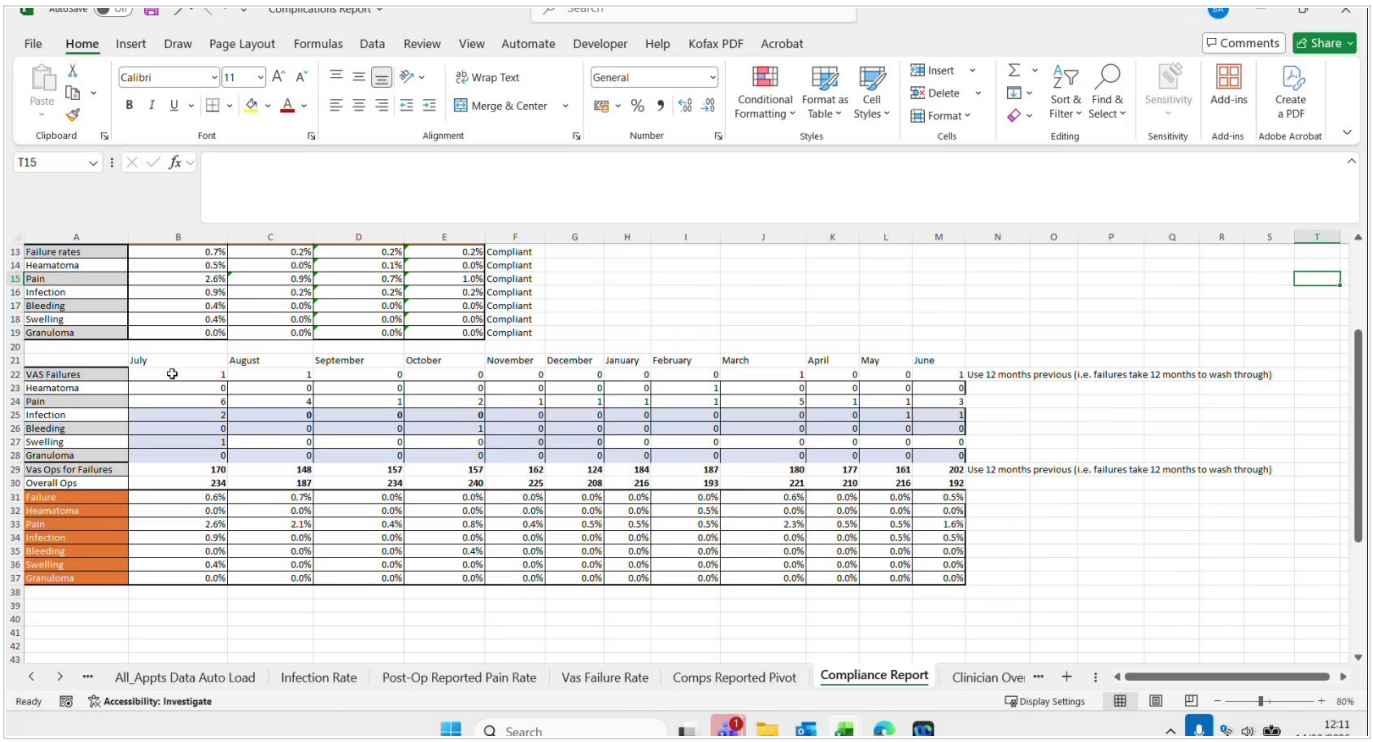

Figure 16 [00:05:32] — Complications Report.xlsm › Compliance Report: Compliance Report: monthly counts July–June (VAS Failures, Haematoma, Pain, Infection, Bleeding, Swelling, Granuloma), VAS Ops for Failures and Overall Ops, and monthly rates (=B22/B29); note “Use 12 months previous (i.e. failures take 12 months to wash through)”

3. VBA Macros to Explain

For each macro we need either the source code (F-01) or a short written description from someone who knows it. The questions below are the minimum answers needed.

ID	What is required	Why it is required (evidence)	Who	Blocks	Spec ref
V-01	**Export the VBA project** (all modules), or confirm there is none	Only ThisWorkbook was opened and was empty (Spec Figure 3 [00:01:47]); the operator was unsure.	IT	Discovery	G-01
V-DS1	**Copy-to-store and Last Updated macros** of Complications Report.xlsm (.bas export), or a statement that the tool has none	The template says each tool copies into Compliance Data “via VBA” and that Last Updated is written “semi-automatically by each user input tool”, but the only macro supplied is the Self-Pay one (tab 04 row 49), and the recording shows manual work. The write rule decides how duplicates are prevented.	IT / tool owner	Loader design	DSL §7, DS-12

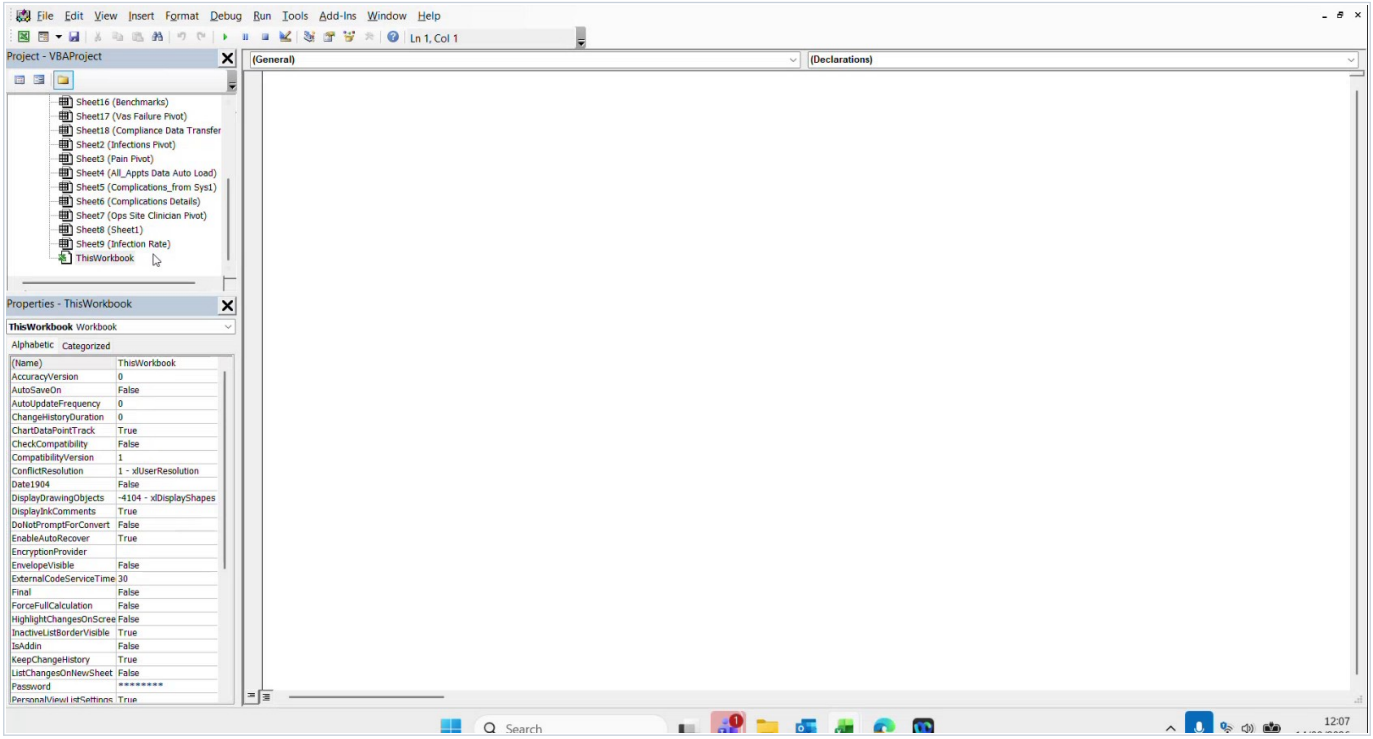

Figure 3 [00:01:47] — Complications Report.xlsm › VBA editor: Operator opens the VBA editor to look for macros: 18 sheet objects (Sheet1…Sheet18) and ThisWorkbook; the module shown is empty (“Oh no, it probably isn’t actually”)

4. Business Rules to Confirm

The new system calculates these instead of relying on people. The rule must be written down and agreed, because once automated it applies to every record.

ID	What is required	Why it is required (evidence)	Who	Blocks	Spec ref
R-01	**Read-code list per complication type**	Five infection codes are tested; others in the export may be missed (FD-03).	Clinical lead	FR-C02	G-04
R-02	**Attribution rule**: which appointment a complication belongs to; time limit after surgery	Today: same NHS number, after the appointment, before the next one (spec BR-01).	Clinical lead	FR-C03	BR-01
R-03	**Standards**: one authoritative set of limits per type and service	Compliance Report and Benchmarks disagree (Spec Figure 19 [00:06:43]).	Clinical lead	FR-C05	G-08
R-04	**Rate definitions**: denominators, the 12-month lag for VAS failure, 3/6/12-month windows, spike = max monthly rate	Read from the sheet but never explained.	Clinical lead	FR-C04	BR-03
R-05	**Dehiscence and Sperm Granuloma**: how they are measured	Published but not calculated (SV-04).	Clinical lead	FR-C06	G-09
R-06	**Issue, Weighting and Due Date** values in the published rows	Meaning of Issue = 10, Weighting = 1, due + 4 weeks unknown (Spec Figure 21 [00:06:54]).	Business owner	FR-C06	G-07
R-07	**Exclusions** (e.g. Dr Saad in one overall rate)	Rules for excluding clinicians or cases must be explicit.	Clinical lead	FR-C04	G-13
R-DS1	**Missing record and Active rules**: a requirement with no record counts as Non Compliant, and only Required + Active rows count toward %	Written in the data store's Requirements formulas (tab 04 rows 212–217). The new scoring must keep them or change them on purpose.	Business owner	Scoring parity	DSL §4.3, DS-06

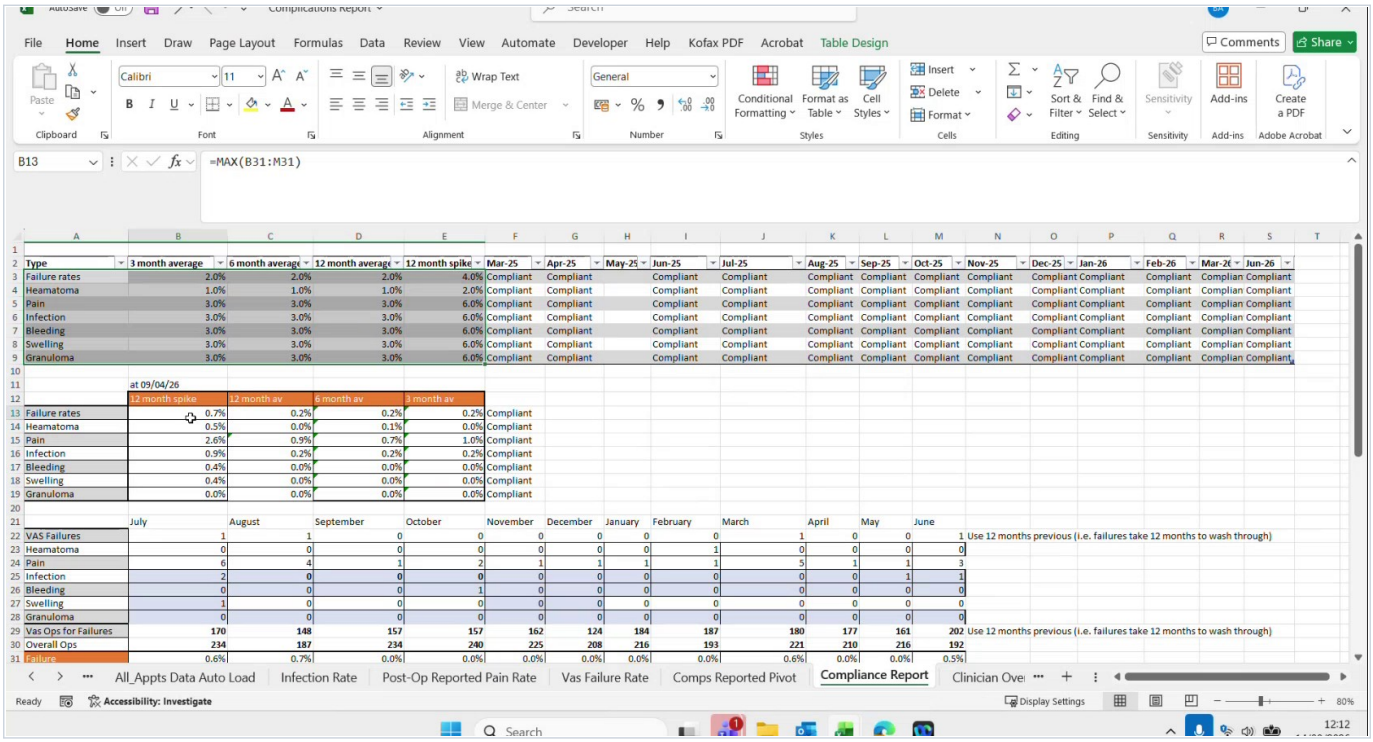

Figure 17 [00:06:14] — Complications Report.xlsm › Compliance Report: Standards (3/6/12-month average and 12-month spike limits per type) and the result block "at 09/04/26": B13 = MAX(B31:M31) as the 12-month spike, Compliant/Non-compliant by comparison; monthly status columns Mar-25…Jun-26

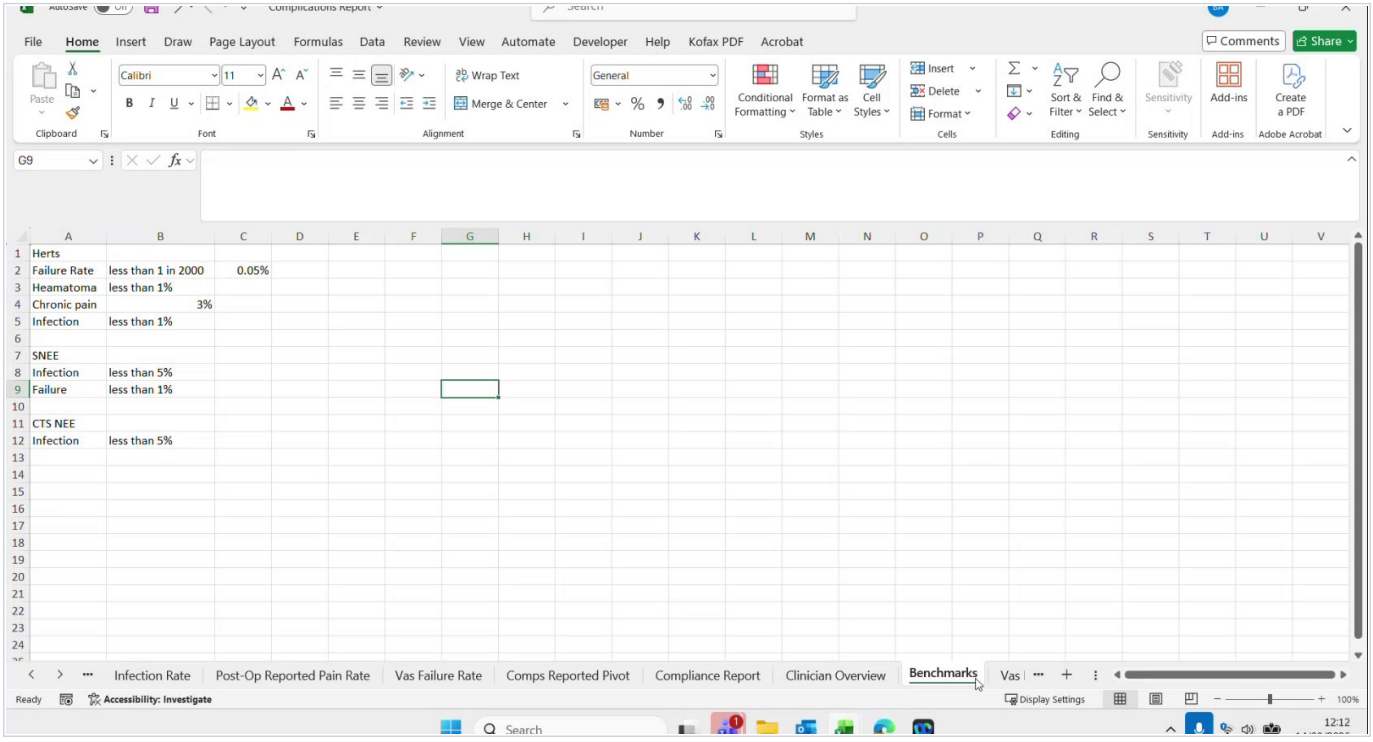

Figure 19 [00:06:43] — Complications Report.xlsm › Benchmarks: Benchmarks tab: Herts — Failure rate less than 1 in 2000 (0.05%), Haematoma less than 1%, Chronic pain 3%, Infection less than 1%; SNEE — Infection less than 5%, Failure less than 1%; CTS NEE — Infection less than 5%. These differ from the limits used on Compliance Report

5. Client Decisions Required

These need clinical-governance and information-governance decisions, not only dashboard decisions.

ID	What is required	Why it is required (evidence)	Who	Blocks	Spec ref
D-01	**Lawful basis, DPIA and Caldicott approval** for processing patient-level data	NHS numbers and clinical notes are processed (FM-01).	Caldicott Guardian / DPO	Before any data load	NFR-C02
D-02	**What the dashboard may show**: aggregates only, small-number rules, clinician-level visibility	Clinician rates are sensitive; patient data must not reach the dashboard.	Business owner + IG	Mart design	NFR-C01
D-03	**Clinical reviewer role** for complication attribution	Replaces the hand-kept log with an accountable review.	Clinical lead	FR-C03	S-02
D-04	**Scope**: services included (vasectomy, carpal tunnel, minor skin ...)	Services differ in benchmarks (Spec Figure 19 [00:06:43]).	Business owner	Data model	G-08
D-05	**Publication cadence and as-of month**	Today the published result date is unclear (09/04/26).	Business owner	FR-C06	FM-04
D-DS1	**Keep or retire** the data store's unexplained calculations (Snapshot, Encoded and Rank columns, Column1) as they affect this area	The client marks 17 of the 88 data-store rows as Unclear/Unknown. Rebuilding them without a purpose adds cost; dropping one the dashboard uses breaks a visual.	Business owner + BI owner	Dashboard scope	DSL §8, DS-17
D-DS2	**Complications in Requirements_Detailed**: should it be added?	complications_requirements_Table is combined into Requirements and the timeframes table but not into Requirements_Detailed (tab 04 rows 202, 227, 249), so Complications may be missing from one dashboard table.	Tool owner + BI owner	Dashboard parity	DSL §2.1, DS-10

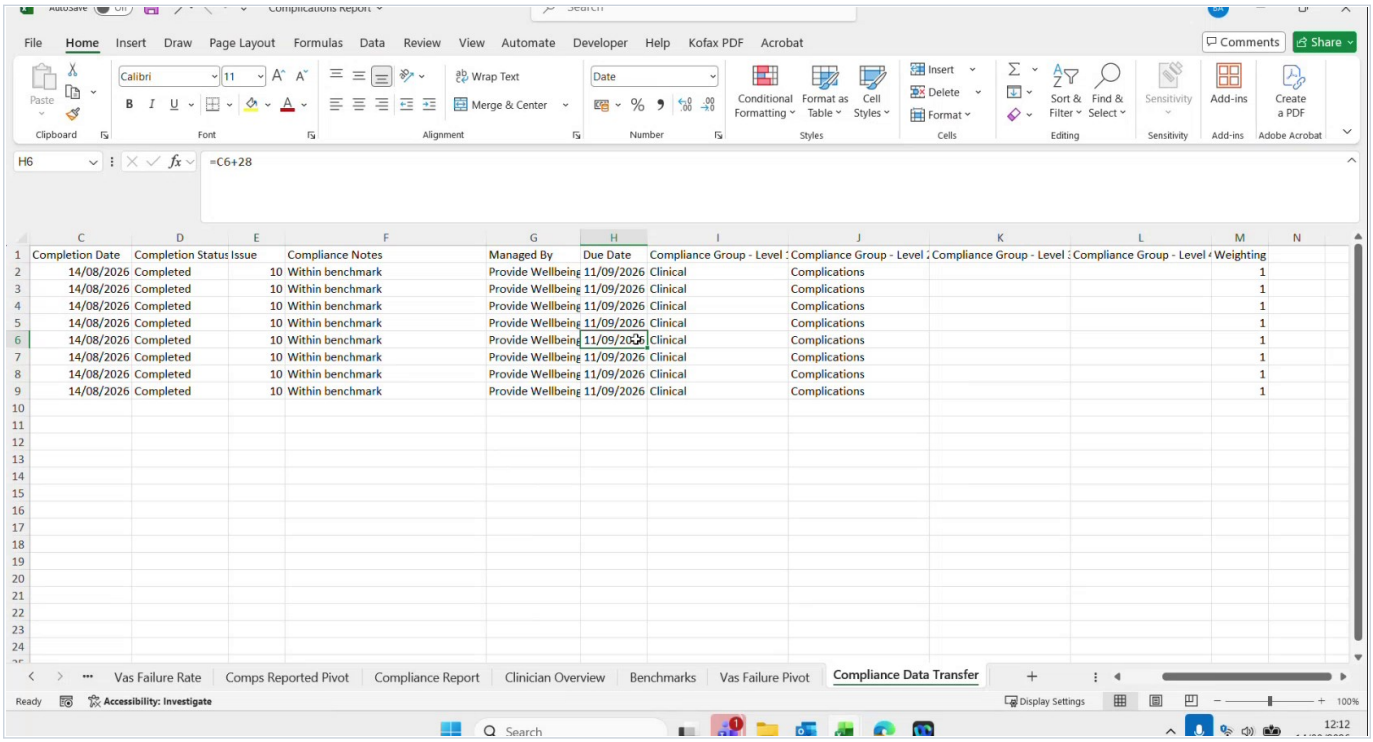

Figure 21 [00:06:54] — Complications Report.xlsm › Compliance Data Transfer: Compliance Data Transfer: 8 rows (Bleeding, Haematoma, Infection, Pain, Sperm Granuloma, Swelling, Vas Failure, Dehiscence) for Provide Wellbeing, all Completed, Issue 10, "Within benchmark", due 11/09/2026, Clinical › Complications, Weighting 1; operator selects rows to copy

6. Sign-off Checklist

Tick each item when the file is received or the decision is recorded. Phase 1 (Foundation) starts when every **Blocker** is ticked.

✓	ID	Item	Owner	Priority	Received / decided (date, by)
☐	F-01	Complications Report.xlsm	Tool owner	**Blocker**	
☐	F-02	SystmOne report definition and an anonymised sample export	Operator / SystmOne admin	**Blocker**	
☐	F-03	Appointments data store access	IT	**Blocker**	
☐	F-04	The “other document” holding the original automated requirements and t	Tool owner	Phase 1	
☐	F-05	Compliance Data.xlsm link list and query definitions	Tool owner	Phase 1	
☐	F-06	Dashboard measures for Complications	BI owner	Phase 1	
☐	S-01	How the monthly counts	Operator	**Blocker**	
☐	S-02	Complications Details log rules	Operator	Phase 1	
☐	S-03	Monthly status columns	Operator	Phase 1	
☐	S-04	Sheet1, Post-Op Reported Pain Rate, Comps Reported Pivot	Operator	Phase 1	
☐	S-05	Clinician name list with all variants	Operator	Phase 1	
☐	V-01	Export the VBA project	IT	Phase 1	
☐	V-DS1	Copy-to-store and Last Updated macros of Complications Report.xlsm	IT / tool owner	Phase 1	
☐	R-01	Read-code list per complication type	Clinical lead	**Blocker**	
☐	R-02	Attribution rule	Clinical lead	**Blocker**	
☐	R-03	Standards	Clinical lead	**Blocker**	
☐	R-04	Rate definitions	Clinical lead	**Blocker**	
☐	R-05	Dehiscence and Sperm Granuloma	Clinical lead	Phase 1	
☐	R-06	Issue, Weighting and Due Date values in the published rows	Business owner	Phase 1	
☐	R-07	Exclusions	Clinical lead	Phase 1	
☐	R-DS1	Missing record and Active rules	Business owner	Phase 1	
☐	D-01	Lawful basis, DPIA and Caldicott approval for processing patient-level	Caldicott Guardian / DPO	**Blocker**	
☐	D-02	What the dashboard may show	Business owner + IG	**Blocker**	
☐	D-03	Clinical reviewer role for complication attribution	Clinical lead	**Blocker**	
☐	D-04	Scope	Business owner	Phase 1	
☐	D-05	Publication cadence and as-of month	Business owner	Phase 1	
☐	D-DS1	Keep or retire the data store’s unexplained calculations	Business owner + BI owner	Phase 1	
☐	D-DS2	Complications in Requirements_Detailed	Tool owner + BI owner	Phase 1	

Signatures

Signing confirms that every Blocker above has been supplied or decided and that the build can start.
