COMPANION TO THE TECHNICAL SPECIFICATION

Pre-Build Client Requirements

Files, sheets, VBA, business rules and client decisions that must be supplied or confirmed before the modern Incident Management compliance system can be built, each with the reason it is required

Applies to	Incidents compliance workflow (Datix export → Incident Management.xlsm → Compliance Data.xlsm → dashboard)
Companion of	Incident_Management_Compliance_Workflow_Specification.pdf (same folder). “Spec Figure N” and IDs such as P-xx, G-xx, FM-xx, FR-xx refer to that document
Evidence	Teams recording 20260811_135933 (7:16); timestamps are video positions
Report date	16 October 2026
Status	Open: awaiting client inputs. Build Phase 1 cannot start until every **Blocker** item in §6 is ticked

Why this document exists. The recording covers only the first half of the update: the Datix export happened off the shared screen and the video stops at 00:07:01, before the #REF! error is fixed and before any refresh or publish. The spec found a broken timeliness formula, a query-vs-paste contradiction, unmapped categories and 14 open gaps that cannot be guessed safely. This list turns them into **32 concrete asks**, each with a reason, the evidence, who should answer it and what it blocks.

How to use it: work through §1–§5, attach files or answers against each ID, then sign the checklist in §6. Anything marked *Blocker* stops the build; the rest can be answered during Phase 1.

Summary

Category	Items	Blockers	Main owner
1. Files to supply	7	F-01, F-02, F-03, F-04	Tool owner / IT
2. Sheets, tabs and columns to explain	7	S-01	Operator
3. VBA macros to explain	3	—	IT
4. Business rules to confirm	8	R-01, R-02, R-03, R-05	Business owner
5. Client decisions	7	D-01, D-02, D-06	Business owner / IG lead

1. Files to Supply

Read-only copies are enough. Without these files the main logic and the target data shapes stay unknown.

ID	What is required	Why it is required (evidence)	Who	Blocks	Spec ref
F-01	**Recording or written steps for the rest of the update** (fix #REF!, save, refresh, update data store, publish)	The video stops at 00:07:01 (Spec Figure 21 [00:07:12]). Everything after the paste check is unknown, including how the error is fixed and how the data reaches the dashboard.	Operator	Phase 0 exit; whole publish design	G-01, P-01
F-02	**Datix export definition and an anonymised sample export** (report/dashboard used, filters, date range, file type, all columns)	The export was done off the shared screen (00:05:14–00:06:17, Spec Figure 15 [00:05:30]). The sample sets the ingestion contract and the header checks.	Operator / Datix admin	FR-I01 ingestion	G-02, P-02
F-03	**Incident Management.xlsm** (full copy) with its **Power Query (M) code**	The Datix table shows a Query ribbon tab, so it is loaded by Power Query, yet the operator describes copy-paste (Spec Figure 13 [00:04:47]). Only the query shows where pasted data really lands.	Tool owner	Schema, migration	G-03, P-03
F-04	**File history of the Datix tab** (a previous version from before #REF! appeared)	The In set timeframe formula tests a deleted column for “Yes” (Spec Figure 20 [00:06:53]). We need to know which column it was to restore the rule.	Tool owner	FR-I04	G-06
F-05	**Compliance Data.xlsm** queries that read this tool	Its Requirements table has 7 columns while Staff Management’s has 10, so the consolidation query must handle both (G-09). Shared with the Staff Management ask.	Tool owner	Data-store design	G-09
F-06	**Dashboard measures** for the incidents dial	How the percentage per type is computed was not shown (G-13); needed for the parity test.	BI owner	T-I04 parity	G-13
F-07	**Datix API / reporting documentation and access**	Needed to decide between an automated pull and a scheduled export (D-01).	IT / Datix admin	FR-I01	P-07

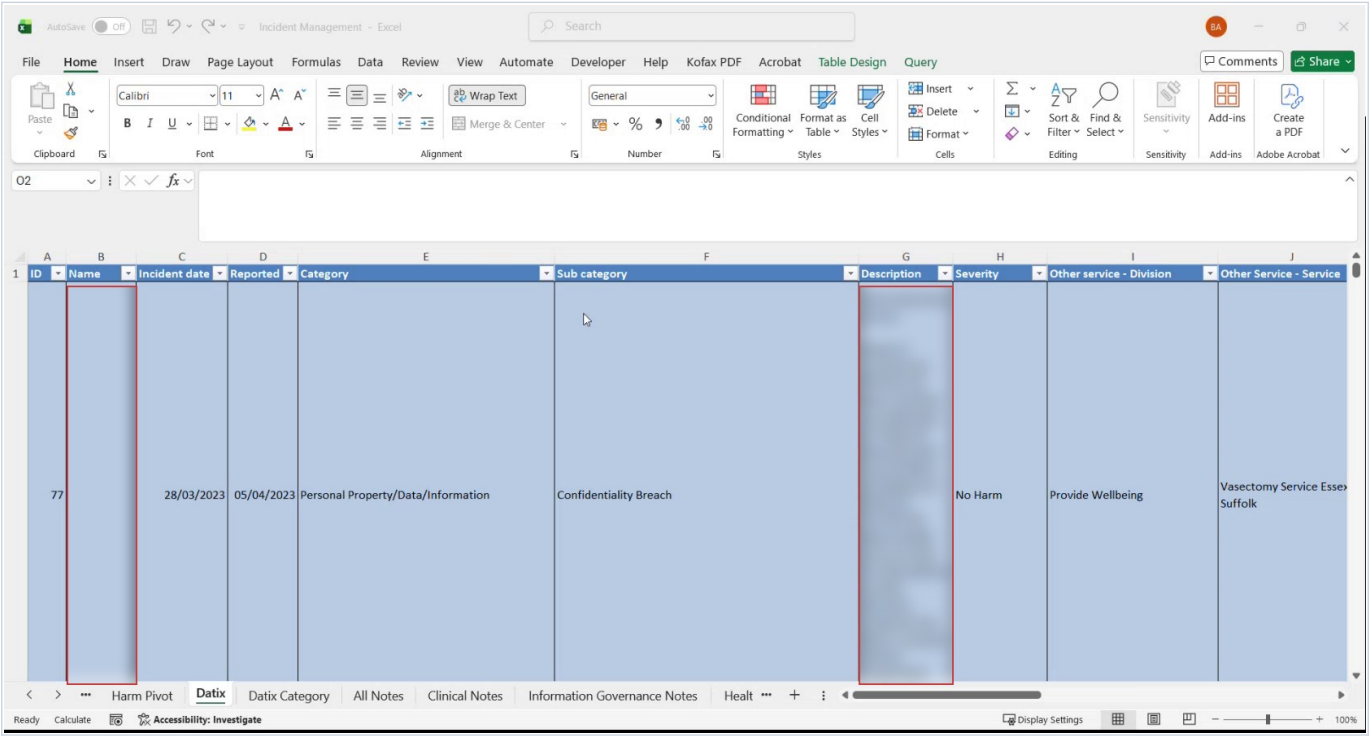

Figure 15 [00:05:30] — Incident Management.xlsm › Datix: While the operator describes going into Datix, opening the dashboard and exporting, the shared screen does not change: the Datix browser window was dragged off the shared screen (05:14). Name and Description blurred in this report

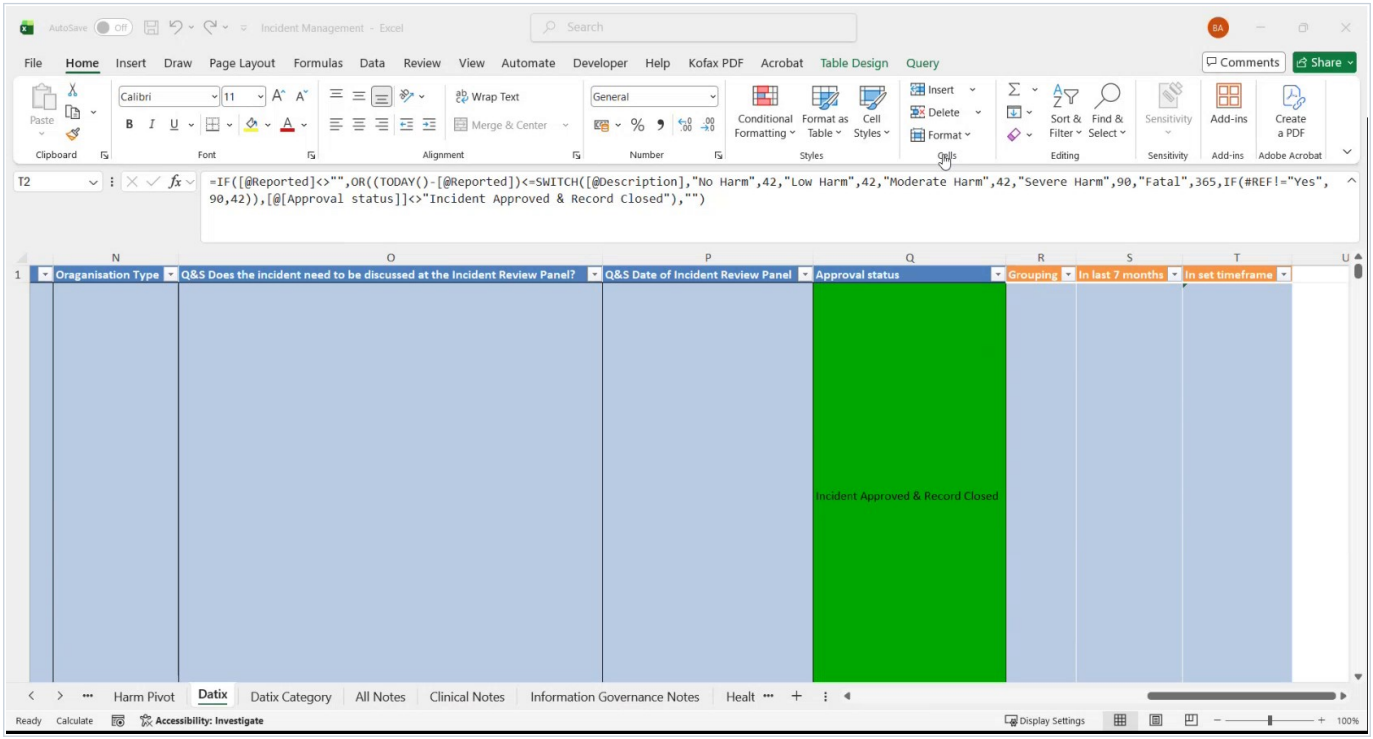

Figure 21 [00:07:12] — Incident Management.xlsm › Datix: Last frame: recording paused by the operator before the #REF! is fixed and before any refresh or publish step

2. Sheets, Tabs and Columns to Explain

These are parts of the workbook that were hidden, never opened, or behaved unexpectedly in the recording.

ID	What is required	Why it is required (evidence)	Who	Blocks	Spec ref
S-01	**Manage Compliance** tab and any macros	It is the first tab but was never opened; the operator says this tool "doesn't work in the same way". It may hold the update logic.	Operator / IT	Phase 0 exit	G-07
S-02	**Estates, Health and Safety, Safeguarding, IG, Clinical, SPC, Miscellaneous** tabs	Named after the groupings and SPC types but not opened (Spec Figure 11 [00:04:36]). They may be the per-group views the dashboard reads.	Operator	FR-I07	G-08
S-03	**Groupings Pivot and Harm Pivot**	Likely the summary counts per group and per harm level; the target views must reproduce them.	Operator	FR-I07, parity	G-08
S-04	**Notes tabs** (All, Clinical, IG, Health and Safety, Estates, Sa… and any further tabs)	Who writes them, when, and whether the dashboard shows them (Spec Figure 19 [00:06:44]).	Operator	FR-I08	G-08
S-05	**"In last 7 months" formula** (Datix column S)	Not shown; it is a reporting-window rule the dashboard probably depends on (Spec Figure 17 [00:06:24]).	Tool owner	FR-I05	G-05
S-06	**Full Datix Category table** plus the list of categories present in Datix	"Administrative Process (excluding documentation)" is in the data but not in the 25-row map (Spec Figure 12 [00:04:45]), so it drops out of every group.	Operator	FR-I03	G-11
S-07	**Missing column** on Compliance Timeframes: keep, fix or drop	It looks in its own table and is TRUE for every row (Spec Figure 9 [00:03:52]).	Operator	Reference load	SV-04

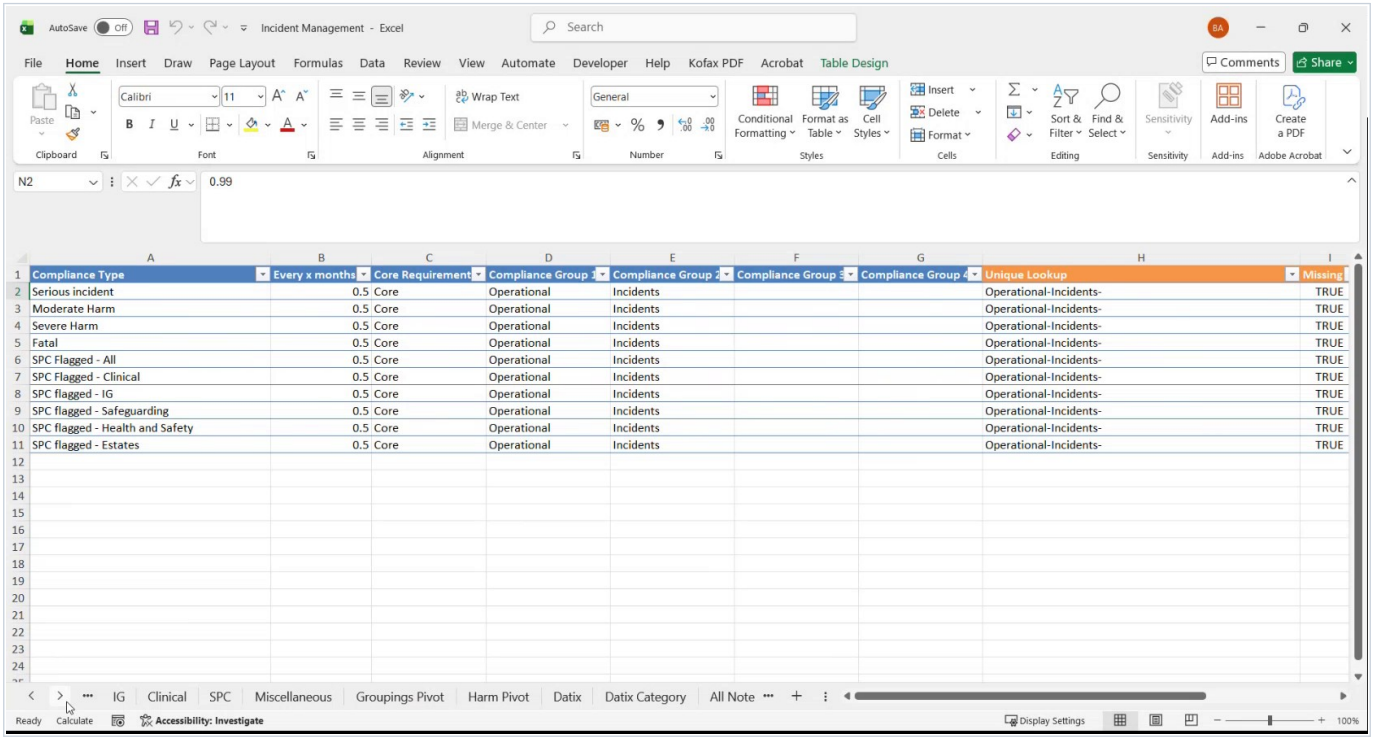

Figure 11 [00:04:36] — Incident Management.xlsm › (tab bar): Tab bar scrolled: … Health and Safety · Safeguarding · IG · Clinical · SPC · Miscellaneous · Groupings Pivot · Harm Pivot · Datix … (none of these opened)

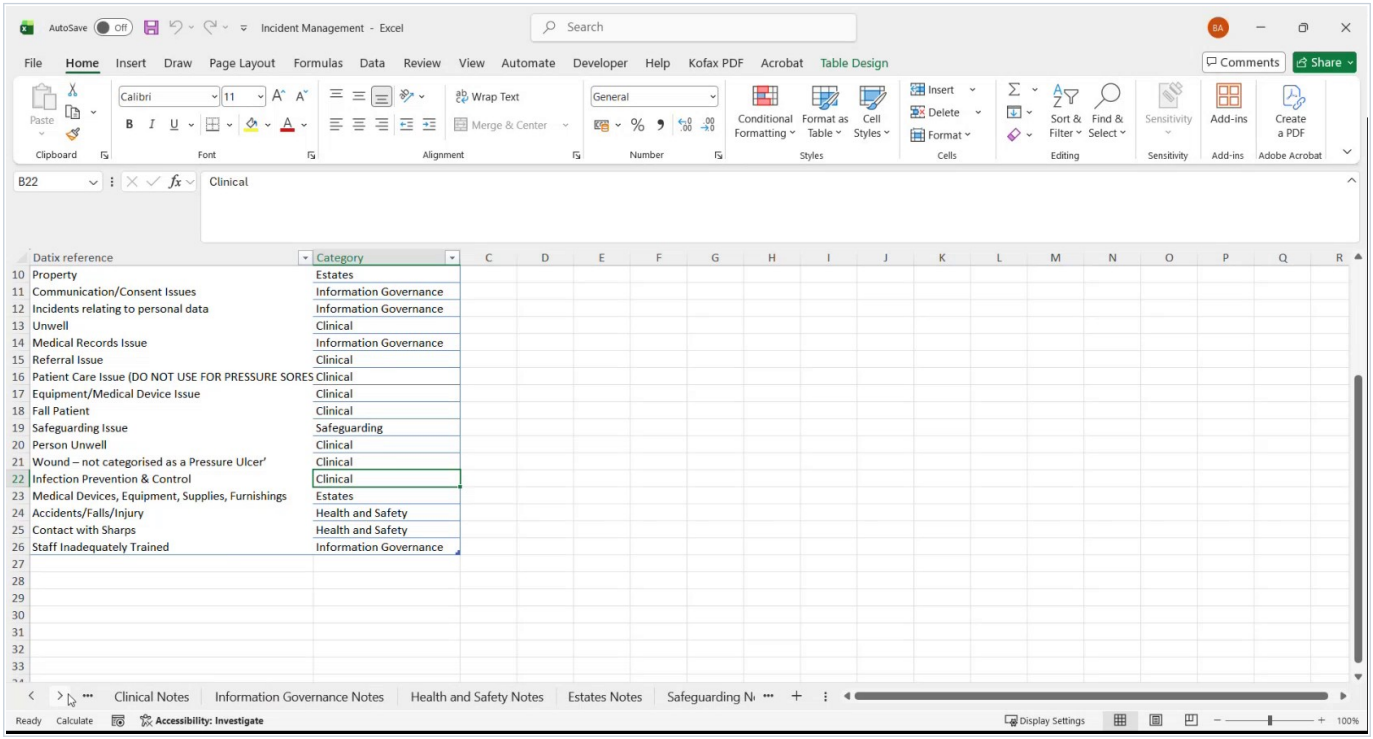

Figure 19 [00:06:44] — Incident Management.xlsm › Datix Category: Rows 10–26 (25 mappings in total); tab bar shows All Notes · Clinical Notes · Information Governance Notes · Health and Safety Notes · Estates Notes · Sa…

3. VBA Macros to Explain

For each macro we need either the source code (F-01) or a short written description from someone who knows it. The questions below are the minimum answers needed.

ID	What is required	Why it is required (evidence)	Who	Blocks	Spec ref
V-01	**Does the workbook contain VBA?** If so, export all modules	The file is .xlsm and has a Manage Compliance tab cloned from the Staff tool, which there runs macros.	IT	Phase 0	G-07
V-02	**Any macro or query step that loads, clears or appends Datix rows**	Decides whether each import replaces or appends rows (FM-05), which drives the merge design.	IT	FR-I02	FM-05
V-03	**Any macro that writes the Notes tabs or the per-group tabs**	These outputs must be reproduced or retired.	IT	FR-I07, FR-I08	G-08

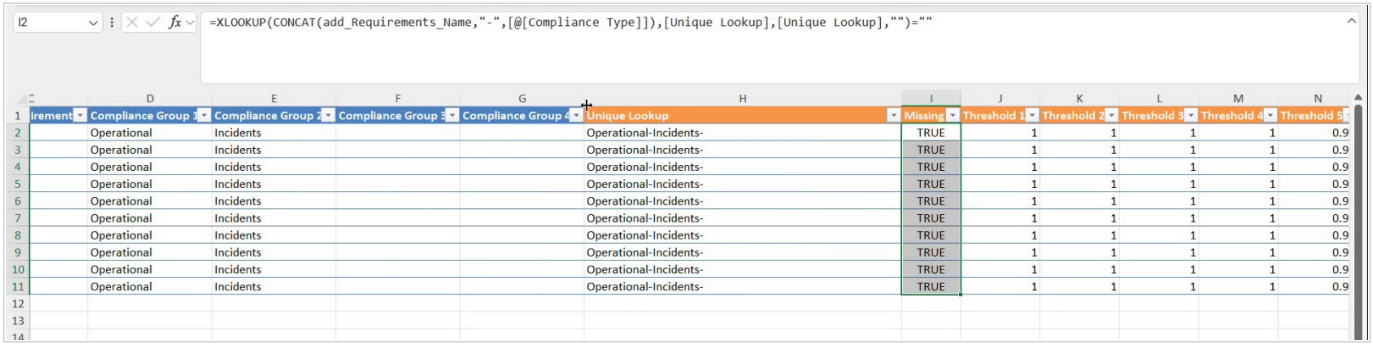

Figure 9 [00:03:52] — Incident Management.xlsm › Compliance Timeframes: Formula bar, I2 Missing: =XLOOKUP(CONCAT(add_Requirements_Name,"-",[@[Compliance Type]]),[Unique Lookup],[Unique Lookup],"")="": looks in its own table's Unique Lookup, so it is TRUE for every row

4. Business Rules to Confirm

The new system calculates these instead of relying on people. The rule must be written down and agreed, because once automated it applies to every record.

ID	What is required	Why it is required (evidence)	Who	Blocks	Spec ref
R-01	**Allowed days per harm level** (No/Low/Moderate 42, Severe 90, Fatal 365?) and the default	Read from the formula (Spec Figure 20 [00:06:53]), but the formula is broken, so the numbers must be confirmed before they are automated.	Incident governance lead	FR-I04	BR-03
R-02	**Which date starts the clock**: Reported or Incident date; and which date stops it (closure date?)	The formula uses TODAY() − Reported, so results change daily and closure timing is ignored (FD-03).	Incident governance lead	FR-I04, FR-I05	G-04
R-03	**Meaning of "in set timeframe"**: closed within the limit, or not yet overdue?	As written, every open incident counts as in timeframe even when overdue, and closed ones fail once they are old (FD-04).	Incident governance lead	FR-I04	G-04
R-04	**The 7-month window**: what it is for and which date it uses	Formula not shown (G-05).	Business owner	FR-I05	G-05
R-05	**Compliance % definition per type** (numerator, denominator, period)	The dial turns green only at 100% (Spec Figure 10 [00:04:04]), so the exact definition decides whether the area is ever green.	Business owner	Dashboard parity	G-13
R-06	**Review cadence**: monthly, or twice a month?	Stored 0.5 months vs "we only look at this every month" (Spec Figure 7 [00:03:20]).	Business owner	FR-I09	SV-02
R-07	**What "SPC flagged" means** and how incidents are flagged	Six of the ten compliance types are SPC flags (Spec Figure 3 [00:01:31]); the rule is not visible.	Business owner	Type definitions	G-12
R-08	**What makes a "Serious incident"**	A compliance type, but no column for it is visible; it may be the deleted column behind #REF!.	Incident governance lead	Type definitions	G-06

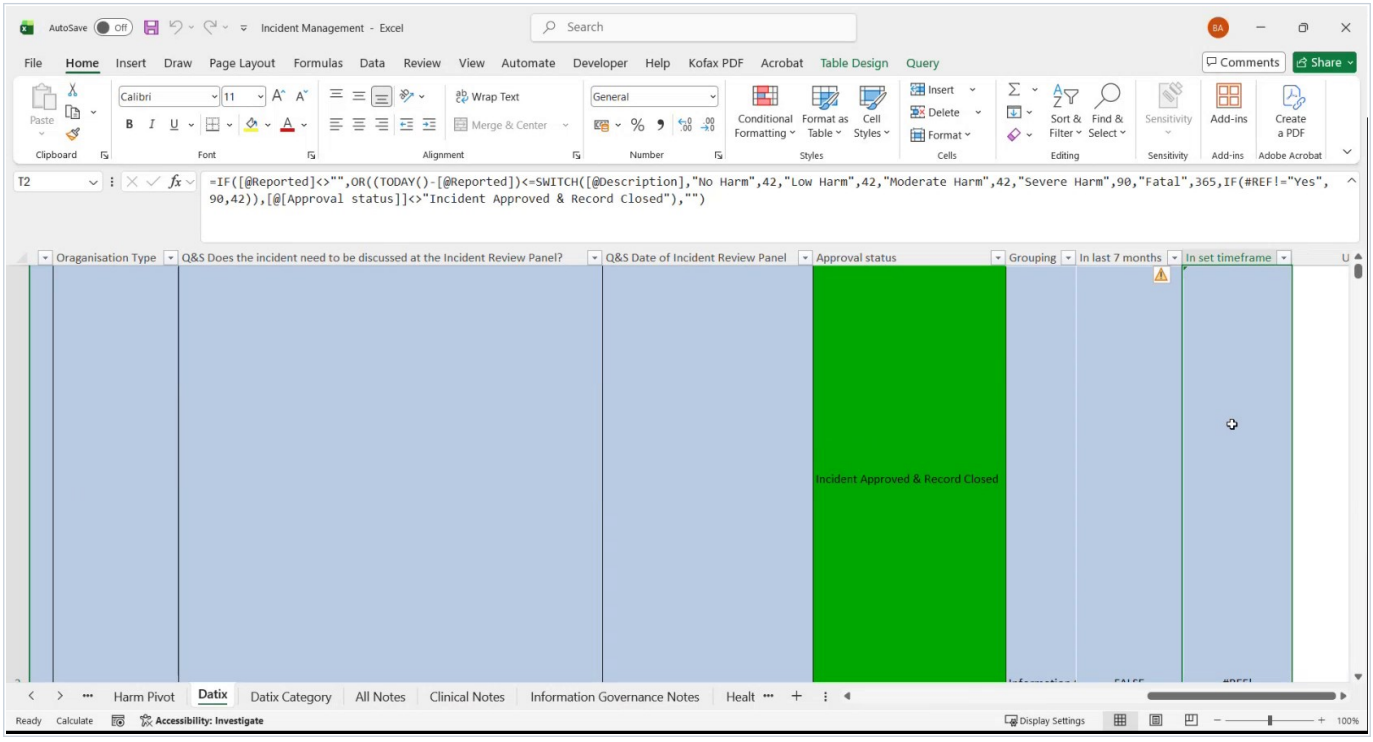

Figure 20 [00:06:53] — Incident Management.xlsm › Datix: Formula bar, T2 In set timeframe: =IF([@Reported]<>"",OR((TODAY()-[@Reported])<=SWITCH([@Description],"No Harm",42,"Low Harm",42,"Moderate Harm",42,"Severe Harm",90,"Fatal",365,IF(#REF!="Yes",90,42)),[@[Approval status]]<>"Incident Approved & Record Closed"),""): result #REF!

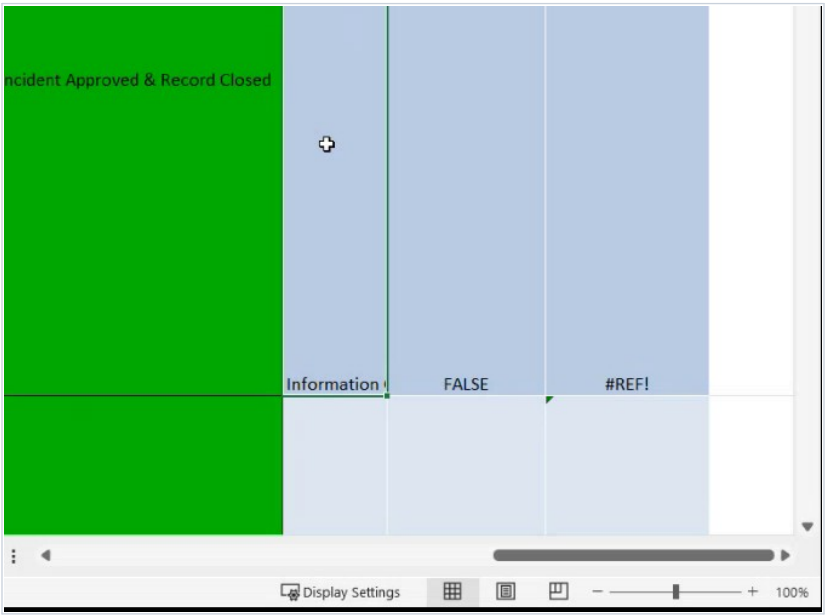

Figure 17 [00:06:24] — Incident Management.xlsm › Datix: Close-up of row 2: Grouping = Information Governance (correct), In last 7 months = FALSE, In set timeframe = #REF!

5. Client Decisions Required

These are policy and governance choices only the business can make. Several depend on incident-governance and information-governance leads, not only on the dashboard owner.

ID	What is required	Why it is required (evidence)	Who	Blocks	Spec ref
D-01	**Datix integration route**: API pull, scheduled report to a secure folder, or manual upload	Removes the manual export and paste (EX-01) and decides the security set-up.	IT + business owner	FR-I01	P-07
D-02	**Which Datix fields may be stored**; in particular Description and Name	They hold patient narratives and personal names (redacted in the spec). The default is not to store them.	IG lead / DPO	Before any data load	P-06, FM-06
D-03	**Category map ownership** and approval of new mappings, incl. “Staff Inadequately Trained → Information Governance”	New Datix categories appear over time; someone must own the map (Spec Figure 18 [00:06:37]).	Business owner	FR-I03	G-11
D-04	**Single subject or per service?**	Incidents carry Division and Service (e.g. Vasectomy Service Essex & Suffolk); the dashboard may need them instead of one Provide Wellbeing subject.	Business owner	Data model	§2.3
D-05	**History**: keep each monthly import as a snapshot?	Needed to show how incidents moved from open to closed and to re-create past months.	Business owner	FR-I02	FM-05
D-06	**DPIA and retention** for incident data in the new system	Incident records are special-category health data in an NHS context.	IG lead / DPO	Before any data load	NFR-I01
D-07	**Named approver** for each monthly incidents publication	Today one person pastes, checks by eye and publishes.	Business owner	FR-I06	BR-08

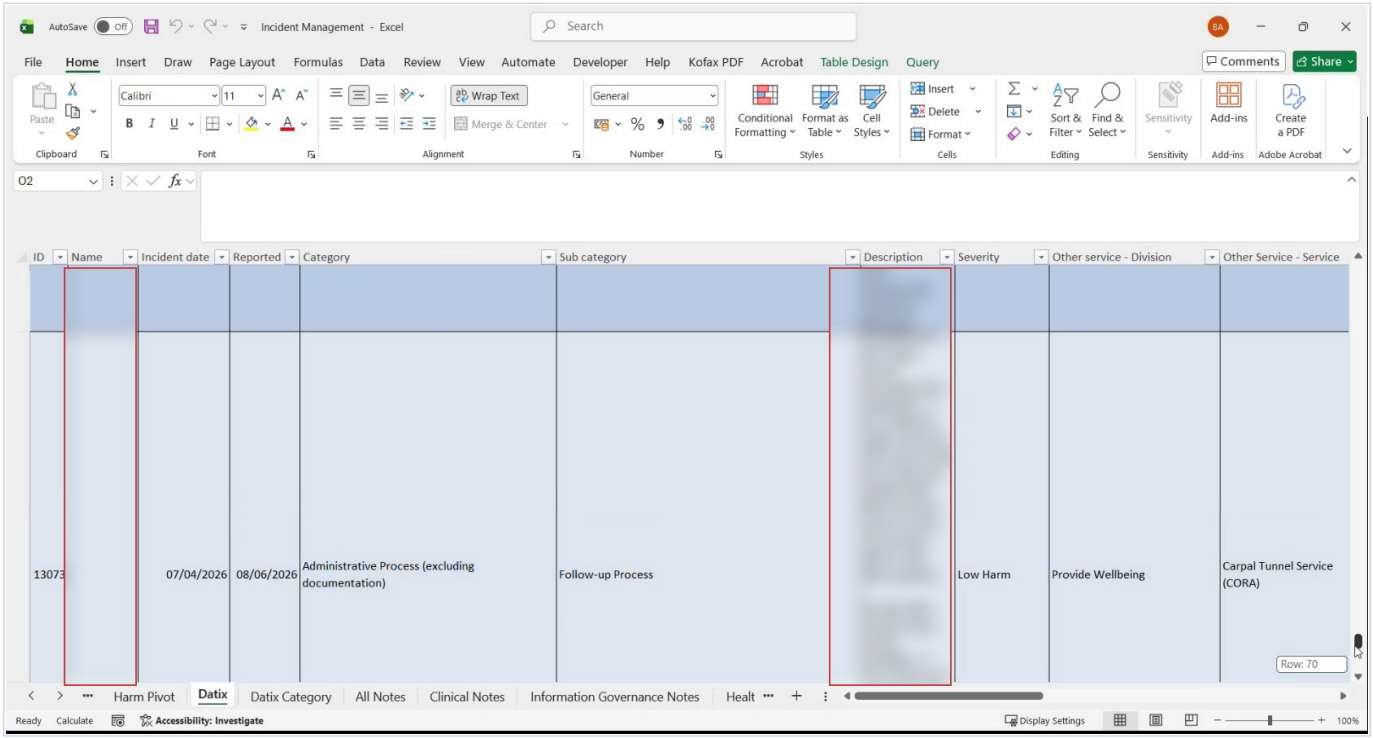

Figure 12 [00:04:45] — Incident Management.xlsm › Datix: On first opening, the Datix sheet is scrolled to a later row: ID 13073, incident 07/04/2026, reported 08/06/2026, so the table holds incidents from 2023 to 2026. Name and Description are blurred in this report (patient and staff information)

6. Sign-off Checklist

Tick each item when the file is received or the decision is recorded. Phase 1 (Foundation) starts when every **Blocker** is ticked.

✓	ID	Item	Owner	Priority	Received / decided (date, by)
☐	F-01	Recording or written steps for the rest of the update	Operator	**Blocker**	
☐	F-02	Datix export definition and an anonymised sample export	Operator / Datix admin	**Blocker**	
☐	F-03	Incident Management.xlsm	Tool owner	**Blocker**	
☐	F-04	File history of the Datix tab	Tool owner	**Blocker**	
☐	F-05	Compliance Data.xlsm queries that read this tool	Tool owner	Phase 1	
☐	F-06	Dashboard measures for the incidents dial	BI owner	Phase 1	
☐	F-07	Datix API / reporting documentation and access	IT / Datix admin	Phase 1	
☐	S-01	Manage Compliance tab and any macros	Operator / IT	**Blocker**	
☐	S-02	Estates, Health and Safety, Safeguarding, IG, Clinical, SPC, Miscellan	Operator	Phase 1	
☐	S-03	Groupings Pivot and Harm Pivot	Operator	Phase 1	
☐	S-04	Notes tabs	Operator	Phase 1	
☐	S-05	“In last 7 months” formula	Tool owner	Phase 1	
☐	S-06	Full Datix Category table plus the list of categories present in Datix	Operator	Phase 1	
☐	S-07	Missing column on Compliance Timeframes	Operator	Phase 1	
☐	V-01	Does the workbook contain VBA? If so, export all modules	IT	Phase 1	
☐	V-02	Any macro or query step that loads, clears or appends Datix rows	IT	Phase 1	
☐	V-03	Any macro that writes the Notes tabs or the per-group tabs	IT	Phase 1	
☐	R-01	Allowed days per harm level	Incident governance lead	**Blocker**	
☐	R-02	Which date starts the clock	Incident governance lead	**Blocker**	
☐	R-03	Meaning of “in set timeframe”	Incident governance lead	**Blocker**	
☐	R-04	The 7-month window	Business owner	Phase 1	
☐	R-05	Compliance % definition per type	Business owner	**Blocker**	
☐	R-06	Review cadence	Business owner	Phase 1	
☐	R-07	What “SPC flagged” means and how incidents are flagged	Business owner	Phase 1	
☐	R-08	What makes a “Serious incident”	Incident governance lead	Phase 1	
☐	D-01	Datix integration route	IT + business owner	**Blocker**	
☐	D-02	Which Datix fields may be stored; in particular Description and Name	IG lead / DPO	**Blocker**	
☐	D-03	Category map ownership and approval of new mappings, incl. “Staff Inad	Business owner	Phase 1	
☐	D-04	Single subject or per service?	Business owner	Phase 1	
☐	D-05	History	Business owner	Phase 1	
☐	D-06	DPIA and retention for incident data in the new system	IG lead / DPO	**Blocker**	
☐	D-07	Named approver for each monthly incidents publication	Business owner	Phase 1
