COMPANION TO THE TECHNICAL SPECIFICATION

Pre-Build Client Requirements

Files, sheets, VBA, business rules and client decisions that must be supplied or confirmed before the modern Staff Management compliance system can be built, each with the reason it is required

Applies to	Staff Management compliance workflow (Staff Management.xlsm → Compliance Data.xlsm → dashboard)
Companion of	Staff_Management_Compliance_Workflow_Specification.pdf (same folder). “Spec Figure N” and IDs such as P-xx, G-xx, FM-xx, FR-xx refer to that document
Evidence	Teams recording 20260811_131142 (30:54); timestamps are video positions
Data store items	IDs ending in -DS come from the client’s source template (sources/Wellbeing Dashboard current data template.xlsx); “DSL §n” and DS-xx refer to 00_Overview/Compliance_Data_Store_Logic.pdf
Report date	16 October 2026
Status	Open: awaiting client inputs. Build Phase 1 cannot start until every **Blocker** item in §6 is ticked

Why this document exists. The recording shows how the operator *uses* the tool, but not the code, the hidden columns, the data store or the policy behind it. Building without these inputs would mean guessing, and the spec found 16 failure modes, 9 spoken-vs-recorded discrepancies and 19 open gaps that guesses would either copy or get wrong. This list turns them into **48 concrete asks**, each with a reason, the evidence, who should answer it and what it blocks.

How to use it: work through §1–§5, attach files or answers against each ID, then sign the checklist in §6. Anything marked *Blocker* stops the build; the rest can be answered during Phase 1.

Summary

Category	Items	Blockers	Main owner
1. Files to supply	7	F-01, F-02, F-03	Tool owner / IT
2. Sheets, tabs and columns to explain	9	S-05, S-08	Operator
3. VBA macros to explain	9	V-05	IT
4. Business rules to confirm	11	R-01, R-03, R-06, R-09	Business owner
5. Client decisions	12	D-01, D-02, D-03, D-07, D-08	Richard / IG lead

1. Files to Supply

Read-only copies are enough. Without these files the main logic and the target data shapes stay unknown.

ID	What is required	Why it is required (evidence)	Who	Blocks	Spec ref
F-01	**VBA project export** of Staff Management.xlsm (all modules and form code, as .bas/.cls, or the .xlsm with the project unlocked)	All write logic sits in macros that were never shown. Without the code we cannot reproduce how *Add New Compliance* appends, which row *Update Existing Compliance* overwrites, or why a blank row stops a batch. The close macro fails with run-time error 13 (Spec Figure 42 [00:29:23]) and an internal expert could not debug it (00:28:09).	IT / tool owner	Phase 0 exit; FR-09, FR-10, FR-14	P-01, G-04, G-15
F-02	**Compliance Data.xlsm**: full copy with every table and all Power Query (M) queries	This is the real data store and the dashboard feed, and it was never on screen (Spec Figure 44 [00:29:38] is a 0.3 s glimpse). We need compliance_Data_Store_Table's columns (only Unique Lookup 3 and Compliance Notes are known, Spec Figure 36 [00:24:03]) and the PQ tables built from every tool, which set the migration source and the dashboard contract.	Tool owner	Schema design, migration, parity test	P-02, G-02, G-06
F-03	**Staff Management.xlsm** itself (current production copy), with hidden columns left as they are	Lets us read every formula directly instead of from video frames, and catches columns never scrolled to. It is also the main migration source (~140 names, ~2,320 requirement rows).	Operator	Migration (DM-01)	§2, DM-01
F-04	**Dashboard file** (likely Power BI, to confirm) with its measures and visuals	The gauge colours use Threshold 1–5 and the dashboard filters on Active = TRUE (00:04:16, 00:10:40), but the tool, measures and meaning of Threshold 1 (= 1) were never shown. The new views must feed the same visuals.	BI owner	FR-20, T-03 parity	G-16
F-05	**The other user-input tools** (Estates, Medical Devices, Incidents …) or one example of each	The operator says they share the same pattern and that PQ merges them all (00:03:22, 00:27:02). The generic subject model must fit them before its schema is frozen.	Tool owner	FR-18, schema freeze	P-11
F-06	**The matching video for the Incidents workflow** (meeting 20260811 135933) and its transcript	The supplied .srt belongs to that meeting, not this one. It describes a Datix export pasted into a tool and a #REF! error that need their own specification.	Operator	Incidents scope	G-01
F-07	**Last Updated tab / process note**	"Last updated" is filled in by hand because its macro fails (00:27:57–00:29:22). We need to know where it lives and who reads it, to replace it with an automatic publish timestamp.	Operator	FR-14	EX-03

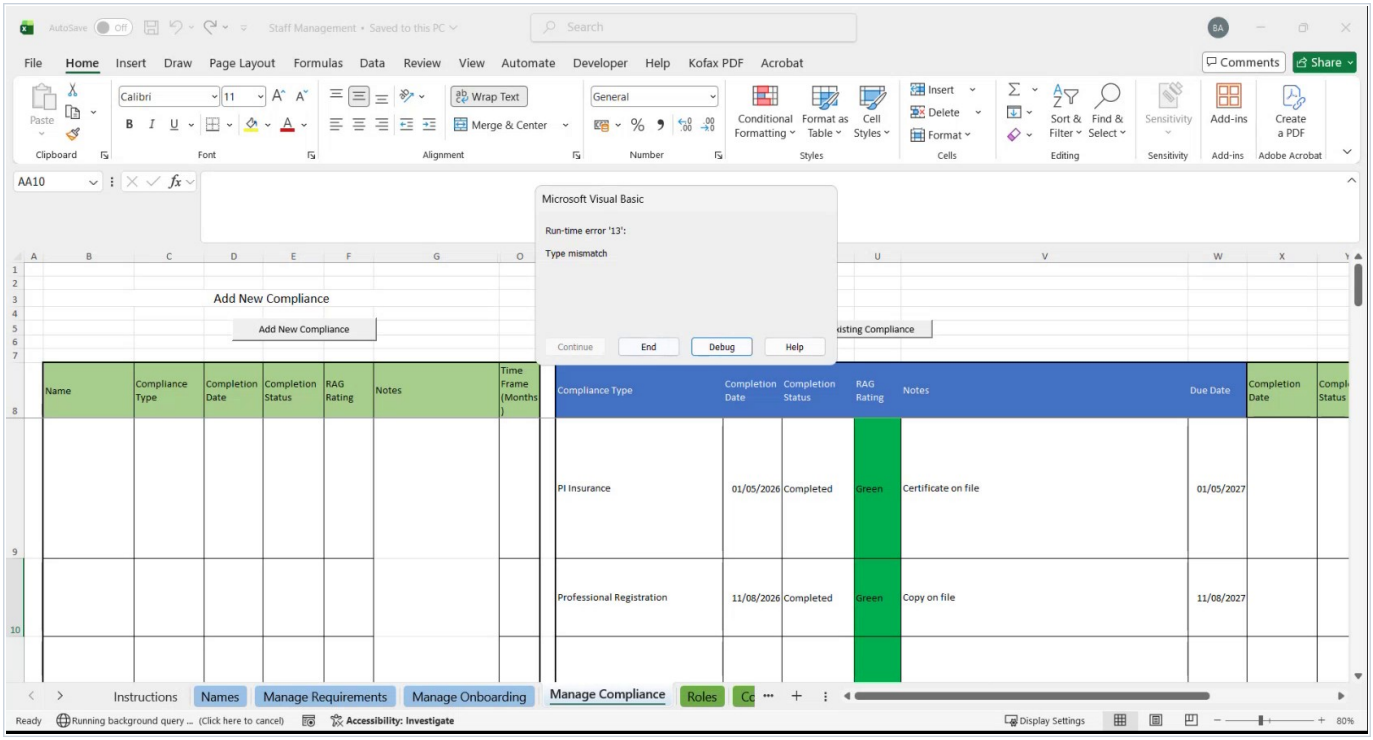

Figure 42 [00:29:23] — Staff Management.xlsm › Manage Compliance: On close: 'Microsoft Visual Basic – Run-time error 13: Type mismatch' from the last-updated prompt macro

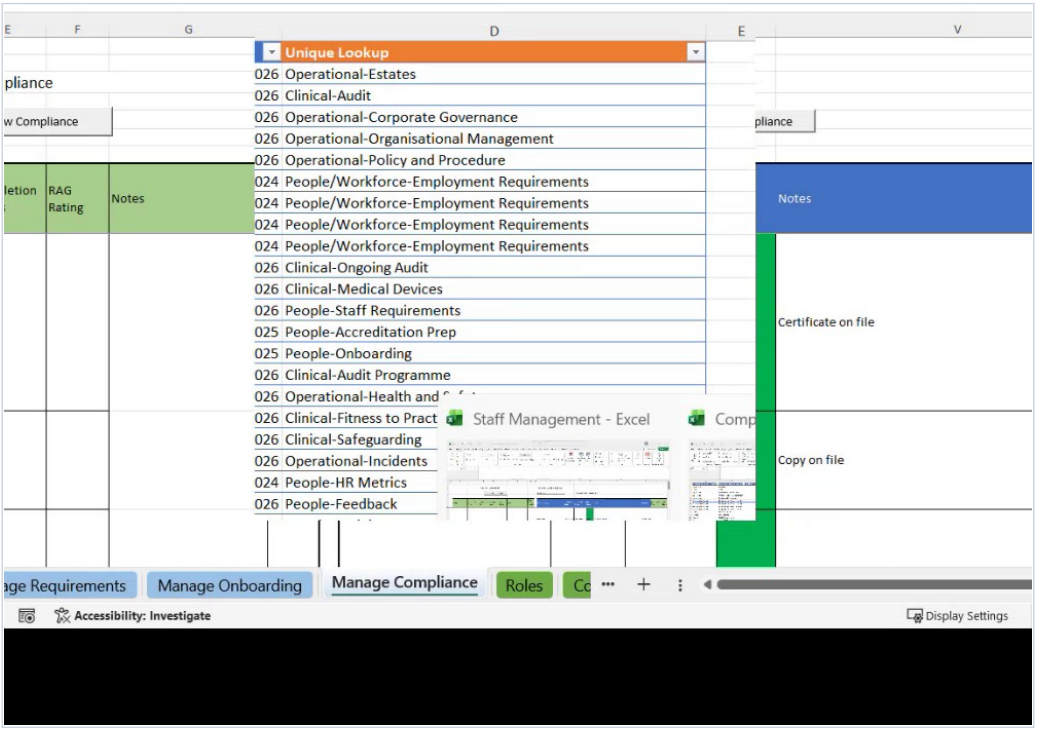

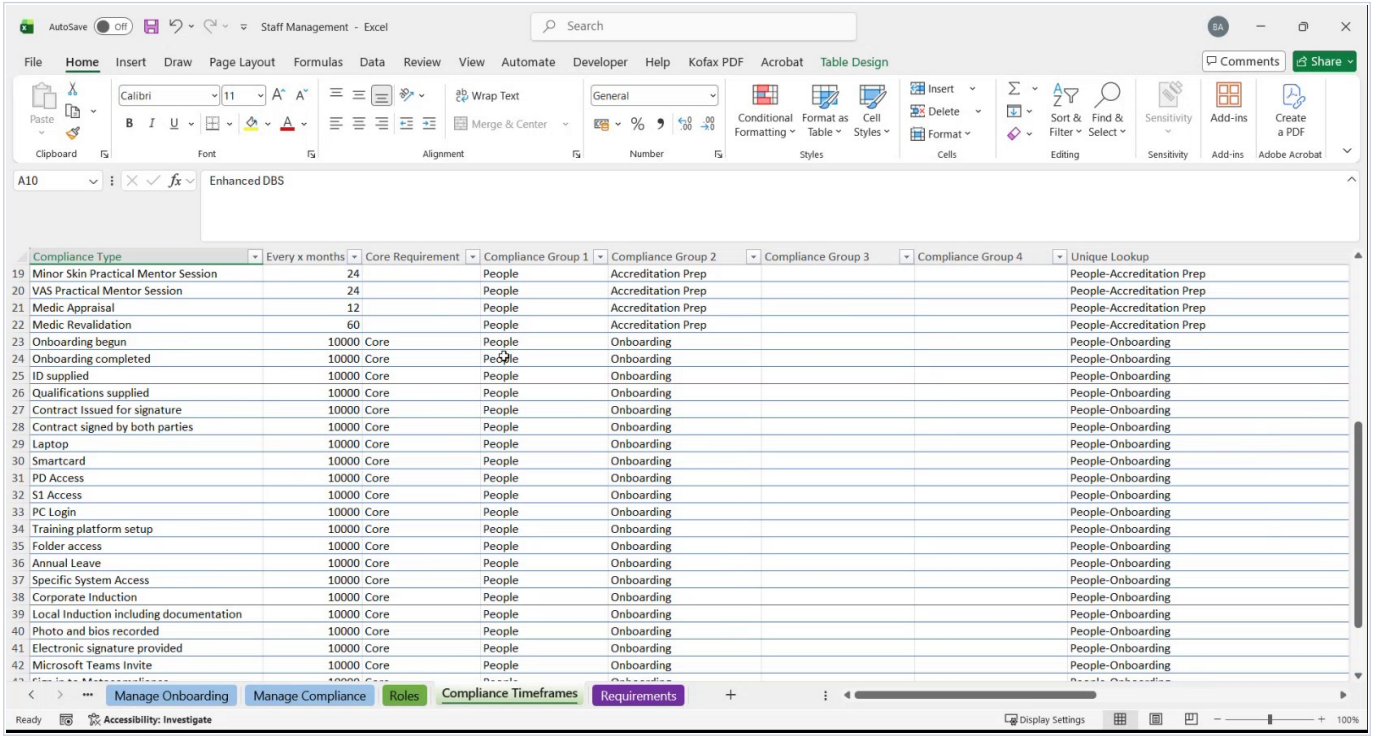

Figure 44 [00:29:38] — Compliance Data.xlsm › (taskbar preview): Brief hover over the Excel taskbar group: a second workbook ('Comp…' = Compliance Data.xlsm) is open, showing a Unique Lookup list prefixed with 024/025/026

2. Sheets, Tabs and Columns to Explain

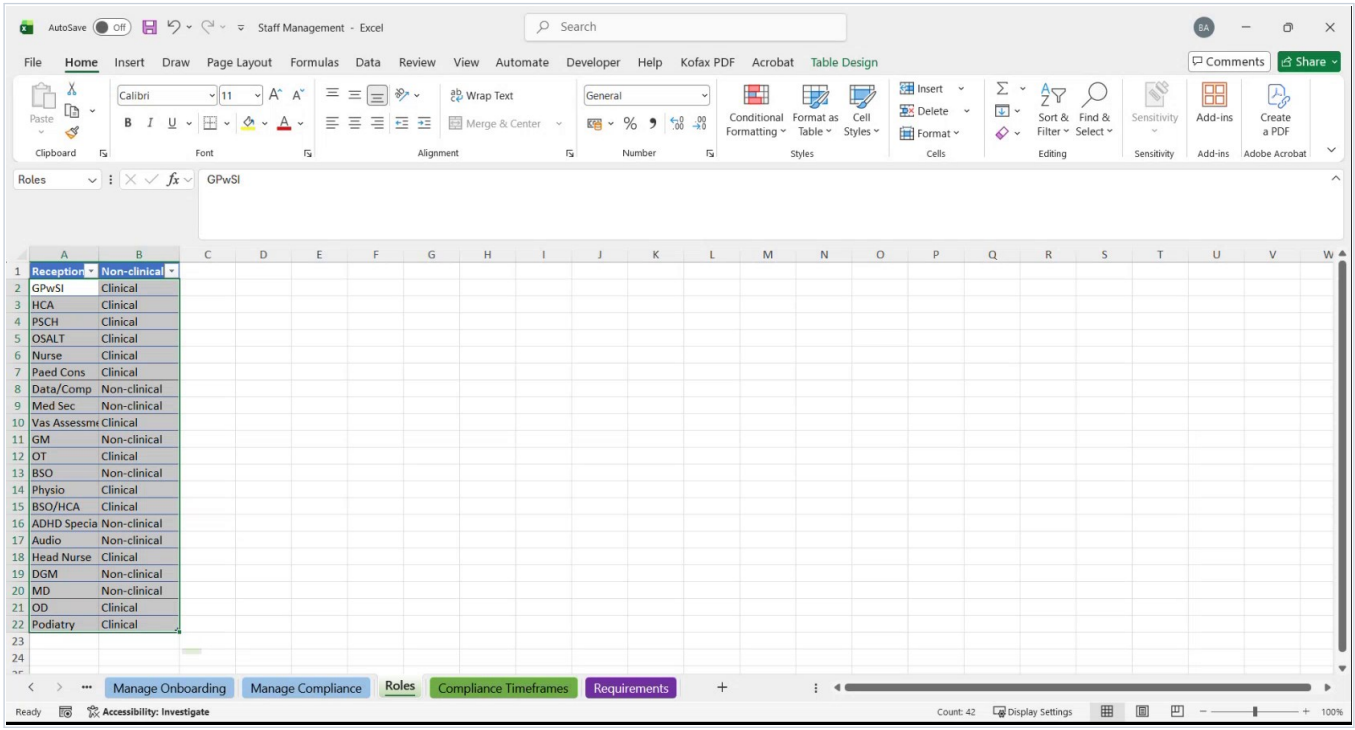

These are parts of the workbook that were hidden, never opened, or behaved unexpectedly in the recording.

ID	What is required	Why it is required (evidence)	Who	Blocks	Spec ref
S-01	**Instructions** tab contents	Never opened. It may hold rules or steps the operator follows but did not mention.	Operator	Discovery	G-12
S-02	**Manage Onboarding** tab and its workflow	Never opened, yet onboarding rows already exist in Requirements (e.g. Shahzad Aslam rows 2102–2119, Spec Figure 17 [00:12:53]) and in the type list (Spec Figure 12 [00:09:13]). Scope depends on decision D-03.	Operator	Onboarding scope	G-12
S-03	**Manage Compliance hidden columns H–N** unhidden and explained	Column letters jump from G to O (Spec Figure 31 [00:20:33]). Hidden columns usually hold lookups the macros rely on.	Operator	FR-06…FR-08	G-10
S-04	**Manage Requirements helper columns M:T** (“originally hidden”) explained	The macro reads them (T11 = coalesce of new and existing values, Spec Figure 20 [00:14:03]); the operator was unsure what they do (00:13:56). A “Site” header shows the form was copied from the Estates tool.	Operator / IT	FR-04	G-10
S-05	**Full Compliance_Timeframe_Table** (all rows, including row 43 onwards)	IR35 Compliant is in the 22-item list and has a 12-month timeframe, but is not among the table rows seen (Spec Figure 12 [00:09:13], Spec Figure 15 [00:11:12]). The catalogue drives every requirement, due date and gauge.	Operator	Reference data load	P-03, G-05
S-06	**Roles tab**: corrected list, and whether it is used at all	The header row holds data (“Reception | Non-clinical”, Spec Figure 16 [00:12:23]), so one role is lost. The operator thinks the tab may be unused (00:12:17).	Operator	FR-17	FM-12
S-07	**Manage Requirements Role cell (D8)**: source and purpose	It showed “Surgical Clinician – NHS Only” for two different people (Spec Figure 18 [00:13:23], Spec Figure 19 [00:13:43]). It is either a broken lookup or dead UI.	Operator	FR-04	G-11
S-08	**Names columns**: which are mandatory, and what Contract, WTE, PD Name and PD Login Email mean	Only Name and Active are known to matter (00:03:41–00:04:16). Managed By may or may not be required (00:03:56). Spec Figure 3 [00:02:58]	Business owner	FR-01, FR-11	P-07, G-17
S-09	**Start Date column**: cell type and the intended format	The new row shows 8/1/2026 while others show dd/mm/yyyy (Spec Figure 40 [00:28:53]): a text-vs-date or locale problem that will break the migration.	Operator	DM-02	G-09

3. VBA Macros to Explain

For each macro we need either the source code (F-01) or a short written description from someone who knows it. The questions below are the minimum answers needed.

ID	What is required	Why it is required (evidence)	Who	Blocks	Spec ref
V-01	**List Missing**: confirm its logic	It appears to use the Missing column, which only checks the person selected on the form (Spec Figure 14 [00:10:23], Spec Figure 21 [00:14:28]). Confirms the rule for the new missing-requirements view.	IT	FR-05	SV-09
V-02	**Add Requirements**: duplicate handling	Requirement counts of 23 and 45 against 22 types (Spec Figure 5 [00:04:23]) suggest duplicate or onboarding rows. Does the macro prevent a second row for the same person and type?	IT	FR-04, DM-03	FM-11
V-03	**Update Requirements**: what it overwrites	Not shown in the video. We need to know whether it edits in place or adds a row, to design the requirement history (SCD-2).	IT	FR-04	§2.5
V-04	**Add New Compliance**: append rule and the “miss a row” behaviour	Operator: “it doesn’t like it if you miss a row” (00:20:45). We must know whether later rows are silently skipped (FM-08), and whether the due date is stored or calculated.	IT	FR-07, FR-11	FM-08
V-05	**Update Existing Compliance**: which record it overwrites when several exist	The store keeps history, but lookups return the first match (Spec Figure 36 [00:24:03]). The amendment overwrote 01/06 with 01/05 in place (Spec Figure 38 [00:26:03]). The answer decides whether migrated history can be trusted.	IT	FR-09, FR-10, DM-03	G-04
V-06	**Delete flag (column AC)**: accepted values and effect	Mentioned (00:24:59) but never used. Is it a hard delete? Needed to map it to a voided event with a reason.	IT	FR-09	§2.6
V-07	**Close / last-updated macro**: code and the cause of error 13	Shown failing (Spec Figure 42 [00:29:23]). Its intended behaviour becomes the automatic publish timestamp.	IT	FR-14	G-15
V-08	**Workbook events** (Open, BeforeSave, BeforeClose) and any auto-refresh triggers	Closing the tool restarted a background query (00:29:20 onward), and the operator avoids saving at close because lookups “can corrupt” (00:29:29). Hidden event code may explain both.	IT	NFR-06	G-18
V-DS1	**Copy-to-store and Last Updated macros** of Staff Management.xlsm (.bas export), or a statement that the tool has none	The template says each tool copies into Compliance Data “via VBA” and that Last Updated is written “semi-automatically by each user input tool”, but the only macro supplied is the Self-Pay one (tab 04 row 49), and the recording shows manual work. The write rule decides how duplicates are prevented.	IT / tool owner	Loader design	DSL §7, DS-12

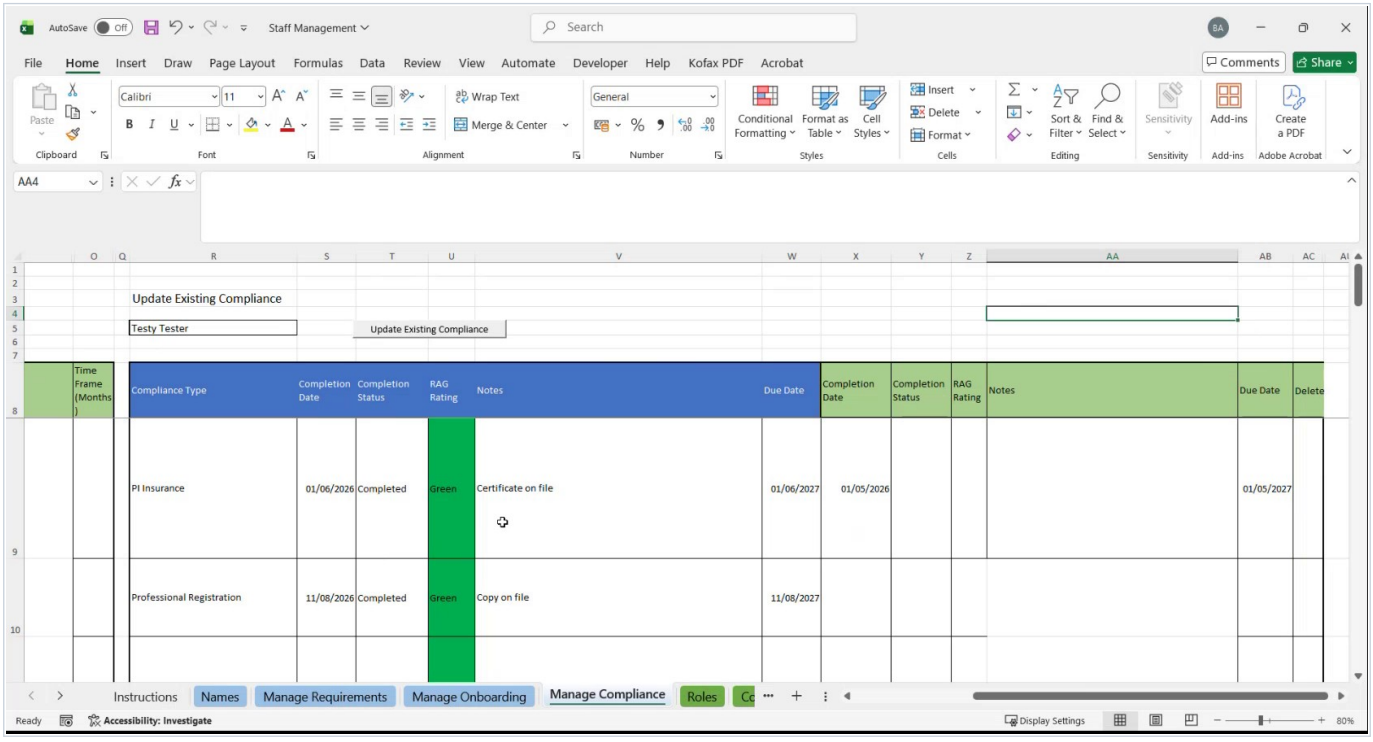

Figure 37 [00:25:03] — Staff Management.xlsm › Manage Compliance: Amendment entered in the green update panel: Completion Date X9 = 01/05/2026 and Due Date AB9 = 01/05/2027 typed by hand (Delete flag column AC)

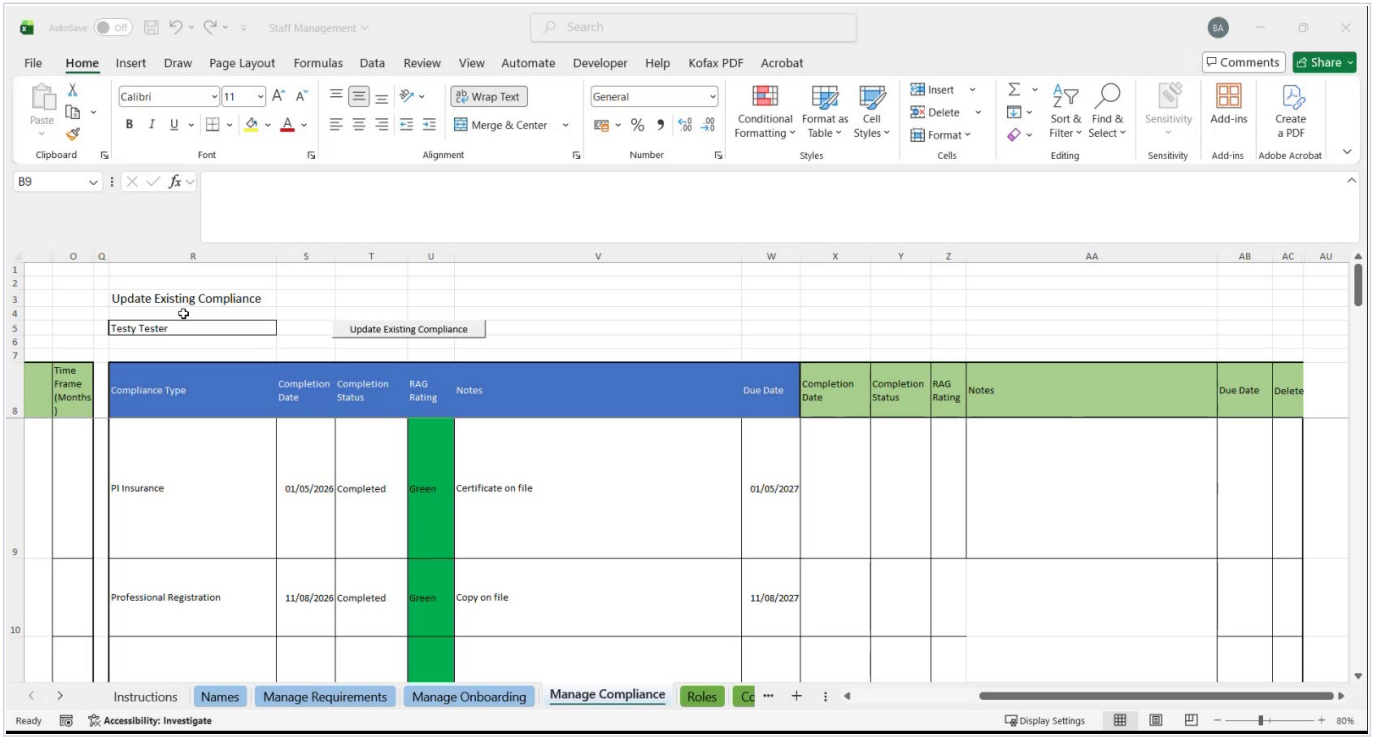

Figure 38 [00:26:03] — Staff Management.xlsm › Manage Compliance: AFTER 'Update Existing Compliance': PI Insurance now 01/05/2026, due 01/05/2027 – record overwritten in place

4. Business Rules to Confirm

The new system calculates these instead of relying on people. The rule must be written down and agreed, because once automated it applies to every record.

ID	What is required	Why it is required (evidence)	Who	Blocks	Spec ref
R-01	**Due-date rule**: due = completion + frequency; is the due date the expiry day or the day before?	Speech: PI insurance runs “to 31 May next year”; the screen shows due 01/06/2027 (Spec Figure 35 [00:23:53]). It is a one-day difference on every item.	Business owner	FR-07	P-05, SV-03
R-02	**Due date on correction**: always recalculated, or may it be typed?	On the update path it was typed by hand (Spec Figure 37 [00:25:03]), so it can drift from the frequency.	Business owner	FR-07, FR-09	FM-09
R-03	**RAG rule**: amber window; how Scheduled and Sign-off Required count	RAG is picked by hand today (Spec Figure 32 [00:20:43], Spec Figure 33 [00:23:02]), so a lapsed item can stay Green.	Business owner	FR-08	P-06, FM-10
R-04	**Gauge thresholds**: confirm 1 / 0.9 / 0.8 / 0.7 / 0.6 (DBS 1 / 0.98 / 0.9 / 0.8 / 0.7) and what Threshold 1 means	They were set by one person (00:11:03) and drive dashboard colours (Spec Figure 15 [00:11:12]).	Business owner	FR-17, FR-20	G-16
R-05	**Coverage metric definition**: which rows count toward “compliance types added”	The current count mixes onboarding rows with a 22-type total, giving 23/22 and 45/22 (Spec Figure 5 [00:04:23]).	Business owner	FR-19	FM-11
R-06	**History vs overwrite**: keep every compliance record, or only the latest?	The operator says the store builds “a picture over time” (00:25:08) but corrections overwrite (00:25:52). The target design keeps everything; please confirm this is wanted.	Business owner	FR-09, FR-10	BR-11
R-07	**Deactivation rule**: when someone leaves, are their records kept and hidden, or removed?	Testy Tester was hidden with Active = FALSE and kept (Spec Figure 41 [00:29:03]). Effective dates (active from/to) need the agreed rule.	Business owner	FR-03	BR-05
R-08	**Never-expiring items**: confirm that 10000 months means “no renewal”	Onboarding items use 10000 as a sentinel (Spec Figure 12 [00:09:13]). It will become an explicit never-expires flag.	Business owner	FR-17	BR-07
R-09	**Mandatory fields** for a person and for a compliance record	A blank Managed By became 0 in 22 rows until fixed by hand (Spec Figure 24 [00:18:33] → Spec Figure 27 [00:19:13]).	Business owner	FR-11	P-07, EX-01
R-DS1	**Missing record and Active rules**: a requirement with no record counts as Non Compliant, and only Required + Active rows count toward %	Written in the data store’s Requirements formulas (tab 04 rows 212–217). The new scoring must keep them or change them on purpose.	Business owner	Scoring parity	DSL §4.3, DS-06
R-DS2	**Blank due date**: should a staff item with no due date count as compliant?	The data store’s default rule marks it Compliant (tab 04 row 192), so missing data shows green.	Business owner	FR-08	DSL §3, DS-02

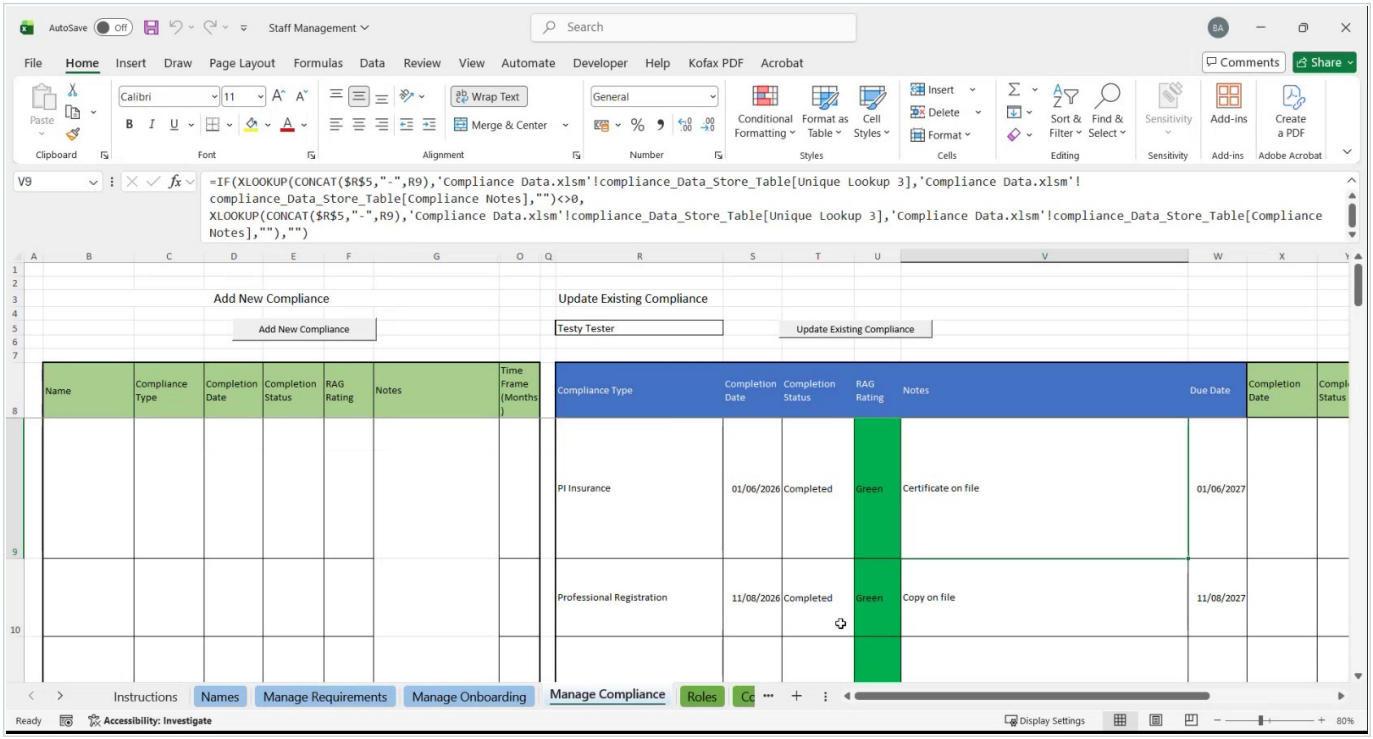

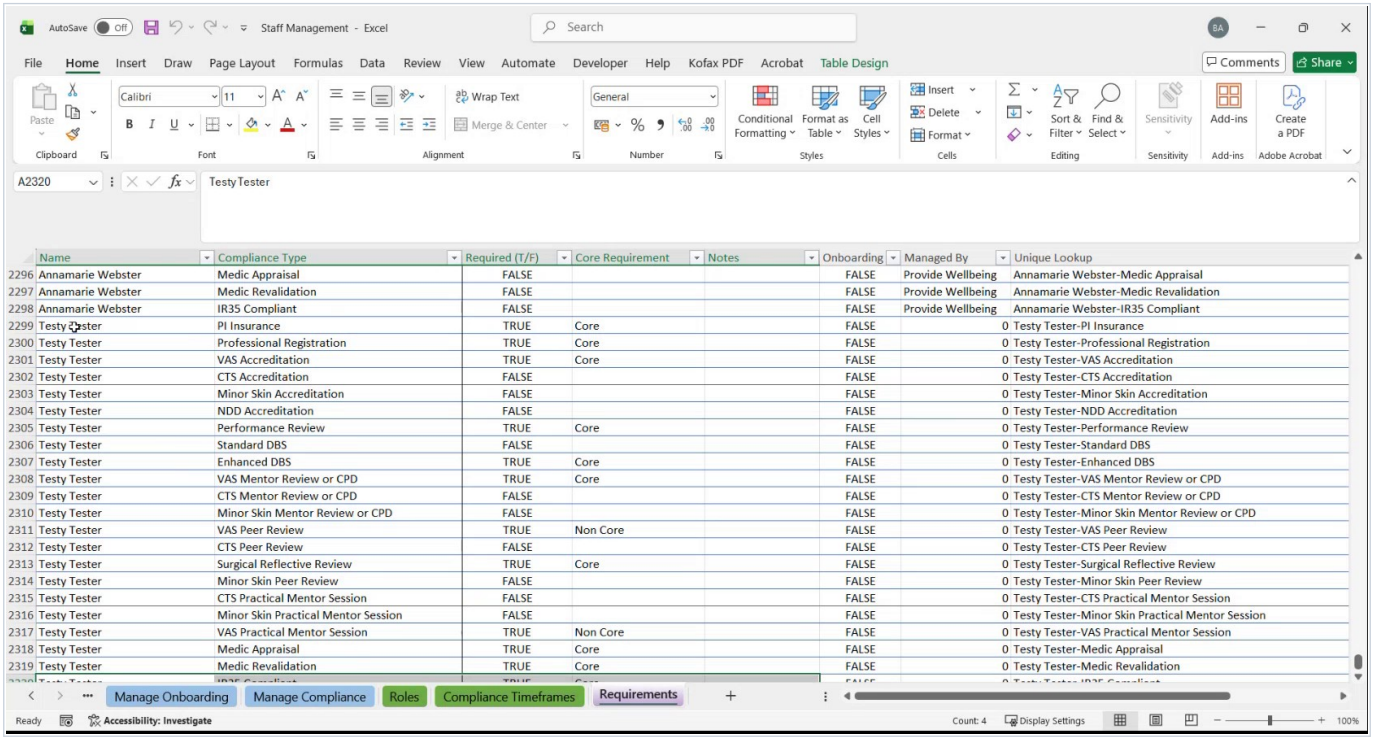

Figure 35 [00:23:53] — Staff Management.xlsm › Manage Compliance: AFTER 'Add New Compliance': entry grid cleared; blue panel now shows PI Insurance 01/06/2026 → Due 01/06/2027, Professional Registration 11/08/2026 → 11/08/2027 read back from the data store

5. Client Decisions Required

These are policy choices only the business can make. The operator named Richard as the decision-maker for the open policy questions (00:09:54).

ID	What is required	Why it is required (evidence)	Who	Blocks	Spec ref
D-01	**Core vs non-core list** for all 22 types (catalogue default)	The operator disagrees with the current flags: accreditation and performance review “should be core”; “Matt very much decided these on his own” (00:08:32–00:08:48). The core percentage on the dashboard depends on it.	Richard (business owner)	Policy v2, go-live	P-04, G-08
D-02	**Compliance Group 3/4**: keep the cross-cutting groups or drop them	“The current feeling is… a main group and a subgroup but not other groups… something Richard needs to make a call on” (00:09:35–00:09:54). It changes the data model and the dashboard groupings.	Richard	Schema freeze	P-04, G-08
D-03	**Onboarding in scope?**	“We no longer do [it] routinely… Richard might decide we should be using it” (00:09:00). It decides whether Manage Onboarding and about 24 checklist items are built.	Richard	Scope	P-04, S-02
D-04	**Correct values for Testy Tester-style entries**: VAS Mentor/CPD and Surgical Reflective Review, Core or Non Core?	Spoken “not core” but saved as Core (Spec Figure 24 [00:18:33]). Confirms which source wins and whether existing people have the same error.	Operator + Richard	DM-03, T-02	SV-01/02
D-05	**Role templates**: which types apply to each role	Today the operator picks 22 types from memory for each person (00:14:50–00:17:53). Templates remove that variation.	Clinical lead + Richard	FR-04	P-08
D-06	**Meaning of Managed By** (contracting organisation or line manager?)	A freelance contractor “not managed by anybody” was set to Provide Wellbeing to clear a 0 (00:05:45 against 00:19:00).	Richard	FR-01	SV-04
D-07	**Named approver(s)** for the four-eyes review and publish	Today one person edits and publishes with no second check.	Richard	FR-13	P-09
D-08	**Information governance**: DPIA, lawful basis, retention for DBS, indemnity and appraisal evidence; who may see contact details	The system will store staff personal data and evidence files centrally (Spec Figure 4 [00:03:13]).	IG lead / DPO	Before any real data is loaded	P-10
D-09	**Test data in production**: delete or keep Testy Tester’s 22 requirement rows and 8 store records	They were left in the live files, hidden only by Active = FALSE (FM-16).	Operator	DM-05	FM-16
D-10	**Technology constraints**: hosting (Azure tenant?), approved database, BI tool, budget owner	The recommended defaults in spec §7.4 assume the Microsoft 365 estate seen in the recording; the organisation must confirm what is allowed.	IT / budget holder	Phase 1	§7.4
D-11	**Success measures** for go-live (e.g. parity within agreed tolerance, Excel retired)	Needed to sign off the parallel run (spec T-03, phase 4).	Richard	Go-live	§7.8
D-DS1	**Keep or retire** the data store’s unexplained calculations (Snapshot, Encoded and Rank columns, Column1) as they affect this area	The client marks 17 of the 88 data-store rows as Unclear/Unknown. Rebuilding them without a purpose adds cost; dropping one the dashboard uses breaks a visual.	Business owner + BI owner	Dashboard scope	DSL §8, DS-17
